

Fees for Performance Recording

Membership of TAURUS DATA Limousin Performance Recording is for a 12-month period from the date of joining or from the date membership from the previous year is renewed. The fee is £5 per calf registered in the previous year. For example, a herd that joins the scheme or renews its membership in 2014 will be due £5 (excl vat) for every calf registered in 2013.

All herds will be asked to renew their acceptance of the Terms and Conditions on an annual basis.

The Muscle and Backfat scanning service (which is voluntary) is charged independently in England and Wales at £6 per head (with a minimum visit fee of £175 and a maximum visit fee of £500). In Scotland, Northern Ireland and Isle of Main, scanning is provided by freelance accredited providers whose fees are independently charged by prior agreement. See factsheet 'Muscle and Backfat Scanning' for further information relating to this service and contact details of scanning technicians.
