FOREWORD

We started the “**Twilyte**” herd way back in October 1991, after going to Carlisle Market. We arrived late, had no catalogue and couldn’t get round the ring! Dad stood in the slip and watched the bulls entering. After numerous bids on a few bulls, he managed to purchase our first Limousin Bull. The funny thing was, he didn’t have a clue who he had bought or anything about him, but he really liked the look of him! That bull was **Carmon Fergal** and he became the backbone of our herd. Due to expanding stock we ended up keeping him for nearly 11 years!

Over the following years we decided to move more towards the pedigree side than the commercial side. We went out and purchased heifers and cows from sales, from the likes of **Scorboro, Coachhouse, Fieldson** and **Fenrose** herds, and the whole of the **Hodgro** herd! We purchased bulls from the **Millbrow, Scarcliffe, Jencralodge, Wilodge, Coachhouse, Greenwell** and **Pennys** herds. Each bull was chosen for their facts and figures to put something different into our stock, as well as catching our eye. Another way we have tried to better our herd was to join a Herd Health Scheme with the intention of purchasing stock from other High Health Herds.

Our outlook on the herd was to keep trying to better it and if we had to see them every day, we wanted to love and enjoy what we had. We have great pride in what you see today, and hope that you will love our stock too. We would like to send our best wishes for the future to all the purchasers of our cattle.

Unfortunately our own health issues and family commitments are behind this sale and it is with heavy hearts we are selling.

We would also like to thank everyone who has been a part of our journey, be it educational or manual, also to Paul and all the staff at Newark Market for their support over the years and for today’s sale.

Dave, George & Julie

A message from our Vet

The **Twilyte** herd of pedigree Limousin cattle have been reared and managed with the greatest attention to detail. The proprietors have utilised routine veterinary intervention in order to maximise fertility and production outputs for the herd.

The adult breeding animals have been kept in good, and consistent body condition and fertility has been excellent with a herd level calving index of less than 350 days. Calf mortality and calf-hood diseases have been kept low with less than 5% pre-weaning mortality rates and very low incidences of both calf scour and pneumonia. The herd has needed very little emergency veterinary care for either calving problems, or sick animals; a testament to both the management of the cattle and the appropriate selection of sires. The herd is accredited and vaccinating for BVD and they have been using IBR marker vaccines, however previous testing suggests they are likely free of this disease.

The herd has been deliberately selected for temperament and are regularly handled.

The animals in the herd are a credit to both the proprietors and the breed and would make a worthy addition to any farm.

Netherhall Chancer was purchased in October 2014 to put length and frame into our stock. His facts and figures speak for themselves. Unfortunately we will not see how good his progeny could be; he has worked well during his stay with us.

Confluence Greta was purchased in February 2013 from Carlisle. He has had stick for having a female name but he has proved he is a good stock bull. He was purchased to be used on heifers who have calved with ease. His progeny are showing great potential with good length on his heifers, and shapely frames on his bulls.
