GENERAL INFORMATION AND SALE NOTES

LOCATION:

The Show and Sale will be held at Brecon Livestock Market, which lies conveniently on the last roundabout of the Brecon bypass (off the A40 Llandovery road) and is signposted there from.

TIMINGS:

The show will commence at 10:00 am followed by the sale at 12 noon

CONDITIONS OF SALE:

The sale will be held under the BLCS Auction Rules, and subject to the recommended Conditions of Sale of the N.B.A. Bulls will be sold under BLCS Collective Sale Rules. Females will be sold under BLCS Breeders' Sale Rules.

METHOD OF SALE:

All cattle will be sold in guineas (105p)

PEDIGREE TRANSFERS:

The pedigree transfers will be dealt with by the Society following the sale.

SETTLEMENT & CLEARANCE OF STOCK:

Settlement in full is due to the Auctioneers at the close of the sale. Any purchasers not known to the Auctioneers must supply a satisfactory reference before removing any stock from the premises.

T.B. PRE-MOVEMENT TESTING:

As from 1st March 2007 all cattle aged 42 days and over are required to be TB tested (and be negative) within 60 days of proposed movement, if they are destined for further breeding/fattening. (i.e. Breeding stock, Store stock) and are in a 1 or 2 year testing parish. If cattle are on farms that are 3 or 4 year testing, they do not need to be tested. ALL CATTLE FROM WALES MUST BE PRE-MOVEMENT TESTED REGARDLESS OF AREA

DELIVERY OF STOCK & INSPECTIONS

Stock may be delivered to the Market:

Friday, 2 nd February	12noon – 4.00pm
Saturday, 3 rd February	7.00am – 8.30am

ALL Inspections

Saturday, 3 rd February	7.30am – 8.30pm
------------------------------------	-----------------

ALL INSPECTIONS WILL BE ON SATURDAY

FOREWORD

LIMOUSIN HERD HEALTH RULES

This British Limousin Cattle Society Sale is being held under the progressive new herd health rules which have been introduced by the BLCS at nominated premier* Collective Society Sales. All vendors are to be members of, and in adherence to, the terms of a CHeCS-licenced Health Scheme.

The Society's new herd health policy at sales has two principal elements:

Part 1. From 1st May 2011, herds selling at the premier Collective Society Sales have to be members of, and adhering to, the terms of a CHeCS-approved Herd Health Scheme. At a minimum, this must include a whole herd test for Johne's disease.

Part 2. From 1st May 2011, all animals male and female, including calves at foot, presented at the premier Collective Society Sales be EITHER from a BVD Accredited Herd within a CHeCS-approved Herd Health Scheme OR to have been BVD tested virus free. All animals forward will be required to be BVD vaccinated prior to sale with an approved vaccine. Pregnant animals must have had testing and vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

*The new Herd Health Rules are in place at all premier BLCS Collective Sales (Stirling February & October; Carlisle February, May, October & December; Brecon February, May & November).

Herd Health at British Limousin Cattle Society (BLCS) Collective Sales

Introduction

Following the cash-back Herd Health Initiative introduced by the Society in 2005, a second major health step saw the introduction of Herd Health Declarations at BLCS Collective Sales from 2007.

The principal aim is to standardise herd health declarations and information presented in order to provide both members and customers alike with clear, accurate herd health information at the point of sale and within the given sale catalogue. As such it is attractive and informative for customers and aims to further raise the level of buyer confidence.

New herd health rules were introduced by the BLCS at nominated premier Collective Society Sales from May 2011 and these are now in place at all premier BLCS Collective Sales (Stirling February & October; Carlisle February, May, October & December; Brecon February, May & November).

BLCS Herd Health Rules have two principal elements:

Part 1. From 1st May 2011, herds selling at the premier Collective Society Sales have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme. At a minimum, this must include a whole herd test for Johne's disease.

Part 2. From 1st May 2011, all animals male and female, including calves at foot, presented at the premier Collective Society Sales be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. All animals forward will be required to be BVD vaccinated prior to sale with an approved vaccine. Pregnant animals must have had testing and vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

Herd Health Declaration

The sale entry form is accompanied by a Herd Health Declaration form asking vendors questions regarding for example: TB status; membership of CHeCS (www.cheecs.co.uk) health schemes (Advance Cattle Health Scheme, AFBI Cattle Health Scheme, Herdsure Cattle Health Improvement Service, HiHealth Herdcare, NML Herdwise, Premium Cattle Health Scheme, Shetland Animal Health Scheme) and Johne's, BVD, IBR and Lepto status. This form is shown here.

A condensed version of the Herd Health Declaration information appears in the Vendors' Index at the front of the respective sale catalogue.

Is the Herd Health Declaration compulsory?

For premier collective sales (Carlisle February, May, October & December; Stirling February & October; Brecon February, May & November) the Herd Health Declaration is compulsory. For reasons of clarity and to provide purchasers with the most accurate information available, vendors are required to complete this at time of entry.

Although not compulsory at other collective sales (Ballymena, Dungannon, Thainstone, Newark & Stirling in May), the Society recommends that vendors complete the Herd Health Declaration. This information then appears in the Vendors' Index within the catalogue. Where a member has chosen not to complete the Herd Health Declaration, it will simply say 'No Herd Health Declaration'.

What Other Health Information may be displayed?

Vendors are encouraged to apply to their respective CHeCS health scheme for individual animal health cards for display on pens. For an individual animal's test results, or vaccination histories, regarding BVD, IBR, Lepto or Johne's, these are permitted above the sale pens only upon presentation of a signed veterinary declaration to verify that the animal concerned has had a clear test.

Again, for reasons of practicality, no health information notes are to be put in the catalogue footnotes by vendors. Similarly, the Society has requested that no declarations on health information be given by the auctioneer during the sale. Again, the sole purpose of this is to avoid confusion and to try and ensure that the information provided is done accurately, fairly and in a standardised format in the catalogue. This point has been agreed with the auctioneers.

Introduction of Johne's Risk Levels from 1st January 2013

From 1st January 2013, CHeCS, the self-regulatory body for cattle health schemes in the UK and Ireland, agreed a change to Johne's testing with herds classified on a Risk Level basis of 1 to 5 (with 1 being low risk and 5 high risk).

The Risk Levels are as follows:

- Risk Level 1 herds that were previously Accredited
- Risk Level 2 herds that have had 1 or more clear qualifying tests
- Risk Level 3 herds that have 3% or fewer reactors every year*
- Risk Level 4 herds that have more than 3% reactors every year**
- Risk Level 5 herds not in a CHeCS Johne's disease programme and herds with no health plan in place

* Note, for herds with fewer than 33 animals in the target age range, rather than 3%, Risk Level 3 will be one animal testing positive for Johne's

** Note, for herds with fewer than 33 animals in the target age range, rather than 3%, Risk Level 4 will be more than one animal testing positive for Johne's

What if a vendor is selling an animal/s that he did not breed?

Vendors are still requested to fill in the Herd Health Sale Declaration accordingly. Prospective customers are advised to speak to vendors directly to acquire accurate health information on animals offered but not bred by the seller.

Feedback & more information

The Society welcomes members' and customers' feedback on the Herd Health Declarations and health policy at sales. If you have further questions, please speak to the Society representatives, Iain Kerr or the Auctioneers.

Disclaimer: The health information above is as supplied by, or on behalf of the breeder.
The responsibility for the accuracy of the information rests solely with the breeder and not with the British Limousin Cattle Society Ltd.

PRIZE SCHEDULE & CLASSIFICATION:

JUDGE: Mr Ian Sedgwick, Gallaber Herd

The Show will commence at 10.00 a.m.

Rosettes will be awarded to 1st, 2nd, 3rd and 4th in each class.

BULL and FEMALE CLASSES WILL BE ALLOCATED ON THE DAY

PRE-SALE INSPECTION:

All Bulls entered for the sale will be inspected by a veterinary Surgeon who will inspect eyes, teeth and testicles. Any abnormalities found to be serious enough will result in the animal(s) being rejected and the necessity to remove such animals from the sale premises. Any other abnormalities such as warts will also be subject to full veterinary inspection. Also all Bulls will be subject to an inspection to include identity, temperament, locomotion and conformation by a Society appointed Inspector as per the Society's byelaws. Bulls will also be weighed and weights declared. Females will be sold under BCLS Breeders' Sale Rules and will be subject to an identity (tag) check only.

INSPECTIONS WILL COMMENCE:

Saturday 3rd February from 7:30 a.m.- 8:30 a.m.

ALL INSPECTIONS WILL BE ON SATURDAY

UPSET PRICE:

All bulls above 14 months of age will be subject to an upset price of 2,000gns.

All females above 12 months of age will be subject to an upset price of 800gns.

SALE OF CHAMPION:

HOW TO USE LIMOUSIN BREEDING VALUES

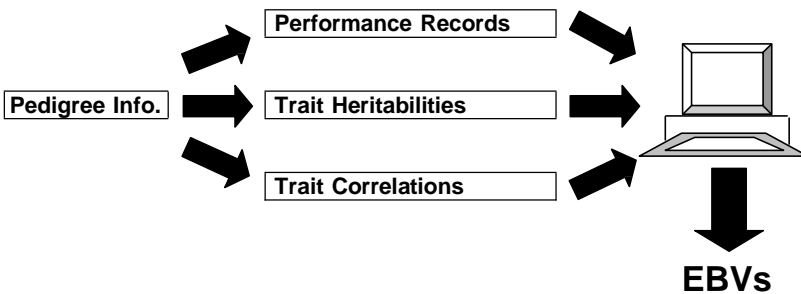

ESTIMATED BREEDING VALUES (EBVs) & GENOMIC BREEDING VALUES (GEBVs)

1. What Are EBVs?

Many factors influence the appearance and performance of a bull. For example, age, nutrition, management, age of dam, health, season, quality of farm and the genes it has inherited from its parents. The only factor that

- Measurements from the animal itself
- Measurements from the animal's herd mates
- (known as 'contemporaries') Measurements from

2. What Are GEBVs?

In March 2016, Genomic Breeding Values (GEBVs) became available for all Limousin cattle for a range of new Carcase Traits. In July 2017, GEBVs also became available for three new Female Fertility traits and

GEBVs take conventional EBVs a step further by using information from animals' DNA as well as the usual measurements of performance. To produce the breeding value the DNA is compared to a DNA 'key' for the breed:

This key is created from a core population of Limousin animals that have been measured on-farm and in the abattoir as well as having DNA collected

The key is like a library that cross refers information from the DNA strand with different levels of abattoir performance.

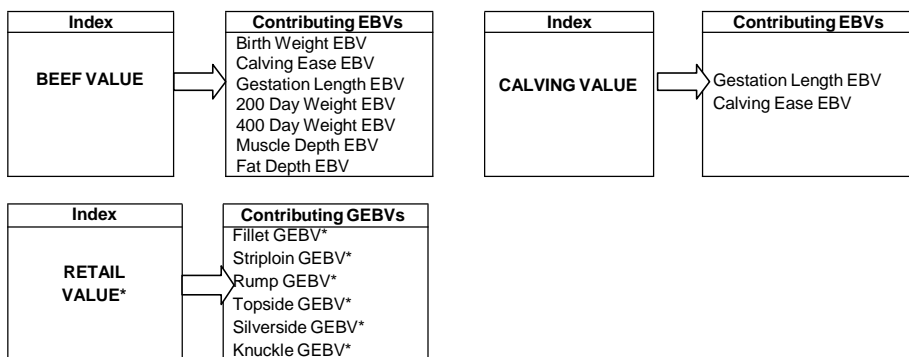

GEBVs are used in exactly the same way as EBVs...

Albeit they are produced in slightly different ways GEBVs are in essence

3. What Are Breeding Indexes?

It is often desirable to select animals on the basis of more than one EBV/GEBV. Breeding Indexes focus on specific breeding goals and combine the appropriate EBVs/GEBVs into a single figure based on their

Three Breeding Indexes are available at

* GEBVs available for animals that have been genotyped for this purpose and where the values have been published by the owner.

When using an Index it is important that your breeding objective is broadly similar to that of the Index in question, otherwise you may unwittingly change aspects of your herd that you did not necessarily want to.

4. What Breeding Value Information Is Available?

In sale catalogues, EBVs & GEBVs are produced for up to eighteen traits that focus on an animal's economic performance.

Trait	Breeding Value Indicates...	Look for...
Birth Weight (kg)	Genetic potential for calf weight at birth	High negative EBVs if you want low calf birth weights
Calving Ease (%)	Ease with which a bull's progeny will be born	High positive EBVs if you want less assisted calvings
Maternal Calving Ease (%)	Ease with which a bull's daughters will calve	High positive EBVs if you want less assisted calvings
Gestation Length (days)	Genetic potential for gestation length	High negative EBVs if you want short gestation lengths
200 Day Milk (kg)	The maternal component of 200 day growth (i.e. the contribution that the milking and maternal abilities of a bull's daughters make towards their calves' growth at 200 days of age)	High positive EBVs if you want daughters to wean heavier calves
200 Day Weight (kg)	Genetic potential for growth from birth to 200 days of age	High positive EBVs if you want high growth rates to weaning
400 Day Weight (kg)	Genetic potential for growth from birth to 400 days of age	High positive EBVs if you want high growth rates to finishing
Muscle Depth (mm)	Genetic potential for muscularity and potential to increase lean meat yield	High positive EBVs if you want good calf conformation
Fat Depth (mm)	Genetic potential for leaner carcasses	Negative EBVs if you want to produce leaner carcasses or take calves to heavier weights without penalty for fatness
Age at 1st Calving (days)	Genetic potential for early sexual maturity	High negative EBVs for a greater proportion of heifers that hold to 1 st service
Calving Interval (days)	Genetic potential for the time taken to get back in calf	High negative values to breed cows that get back in calf quickly
Docity (%)	Genetic potential for being calm when handled	High positive values for animals that are likely to be more calm when handled
Scrotal Circumference (cm)	Genetic potential for scrotal size. Linked to male serving capacity and puberty of daughters.	High positive values for animals with higher likely serving capacity and earlier maturing
Age to Slaughter GEBV (days)	Age at slaughter assuming a standard carcass weight of 350kgs	High negative values (less days) for animals that will reach 350 kg deadweight quicker
Carcass Weight GEBV (kg)	Carcass weight at a standard slaughter age of 600 days	High positive values for animals that will reach heavier carcass weights at 600 days of age
Fillet GEBV (kg)	Weight of fillet at a standard slaughter age of 600 days and carcass weight of 350kg	High positive values for higher fillet weights in the carcass
Striploin GEBV (kg)	Weight of striploin at a standard slaughter age of 600 days and carcass weight of 350kg	High positive values for higher striploin weights in the carcass
Rump GEBV (kg)	Weight of rump at a standard slaughter age of 600 days and carcass weight of 350kg	High positive values for higher rump weights in the carcass

Breeding values for further traits for each animal are available on

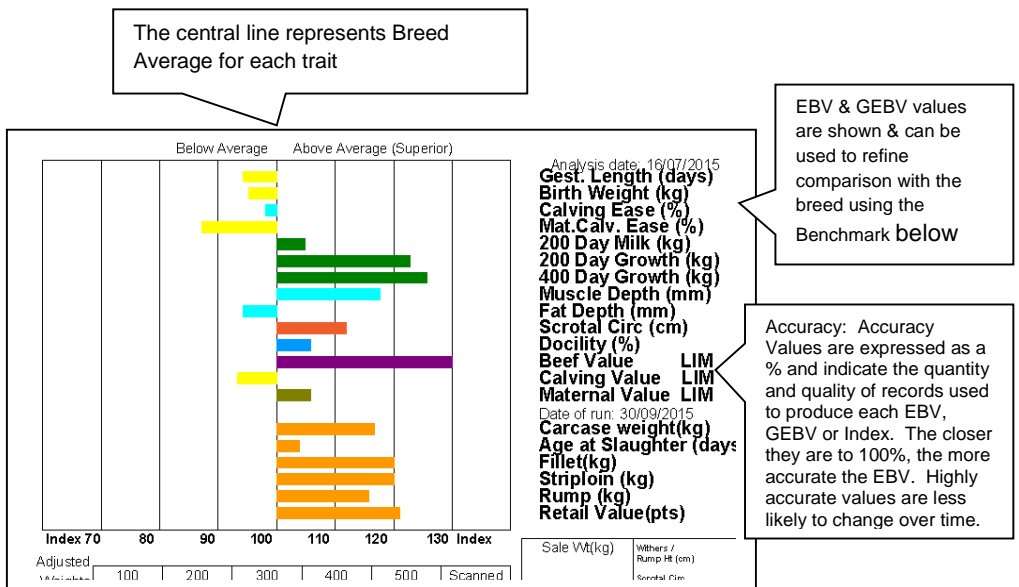

www.taurusdata.co.uk. Enter animal name or ear number in the Quick Search box.

You can also search by breeder and by breeding values ('Breeder Search' and 'EBV Search'). The additional traits available are:

- Longevity EBV & GEBV
- Calf Survival EBV & GEBV
- Knuckle EBV & GEBV
- Silverside EBV & GEBV
- Topside EBV & GEBV

5. How to Use the Information in This Catalogue

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average. In sale catalogues, Breed Average for each trait is represented by the vertical line that is central on the bar chart. Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are. Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are. An example is as follows:

Adjusted weights are the 'raw' weights recorded for the animal, adjusted to the nearest 100 days. No adjustment has been made to account for the effects of the environment, feeding etc.

6. Things to Consider...

- To establish just how much influence a bull will pass on to his progeny it is important to remember to halve the value of the EBV/GEBV, since the other half of a calf's genes comes from the cow.

For example, a bull with a 400-Day Growth EBV of +62 is estimated to have the genetic potential to be 62kg heavier at 400 days of age compared to a bull with an EBV of 0. His calves would be expected to be 31kg heavier at that age when compared to calves by a bull with an EBV of 0, since they only inherit half of their growth genes from their sire (the other half coming from their dam).

- Select animals using EBVs/GEBVs that are relevant to your farm, cow type and market
- Bear in mind that EBVs/GEBVs predict an animal's economic performance. They are no judge of factors such as soundness, locomotion, breed type etc and you must be satisfied with your potential purchase in these respects too.
- Consider the traits that will make you most money, but
- Don't forget to check traits you may be compromising in pursuit of your goals, such as Calving Ease etc
- EBVs/GEBVs change as time goes on. New calves and new performance records tell us more about animals' breeding potential. Limousin EBVs/GEBVs are updated three times per annum and all values will change as more information is added and the accuracy of the predictions increases.

7. EBV/GEBV & Pedigree Info Just a Click Away

EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Click the 'Taurusdata Online Herd Book' button on the Limousin Society homepage (www.limousin.co.uk) or go direct to www.taurusdata.co.uk

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

8. Further Information

For further information, please contact Alison Glasgow, British Limousin Cattle Society on telephone 02476 696500, e-mail alison@limousin.co.uk or visit the BLCS web site www.limousin.co.uk, 'Performance Programmes'.

LIMOUSIN

Post-Purchase Management of Young Bulls

Prepared by Ian Pritchard, Beef Specialist, SAC

Purchase

Buy well in advance to allow time to settle – make it a planned rather than last minute decision. Recommendation is to buy at autumn sale for early spring use or February sale for later spring use or May sale for autumn use

On getting bull home, isolate bull for a month. Check his working capability and health and vaccinate/treat as necessary. A semen test should be carried out. Try and minimise stress

Remember a short working life increases cost

Insurance companies may refuse claims in cases of unsatisfactory management of a bull

Feeding

Young bulls are in forward condition at sale and should be allowed to lose condition gradually – they are still maturing. Dietary changes should not be sudden – try and find out the diet prior to purchase so that a stable rumen environment can be maintained. Forage alone will not be sufficient to maintain a young bull which may be anything up to 1,000kg in weight. They should be fed to gain at 0.8kg/day

Feed concentrates in at least 2 feeds for one month after purchase. Prior to purchase, a bull will have been fed on a high concentrate level fed frequently per day

A bull will have seen little grass since the suckling period. Ideally do not turn to grass without supplementary feed for at least 4-6 weeks after purchase

“Do not keep him on a slippery floor surface. Look after his feet by trying to keep him on a partial hard surface”

Housing

Bulls will have been in individual pens with a lot of human contact (walking/grooming) plus several feeds per day

Do not ignore him post-purchase by keeping him in a confined space or tied in a dark shed. Provide him with human contact and allow him to see his surroundings even though he is in isolation

Do not keep him on a slippery floor surface and certainly do not allow him to serve cows on this surface. Look after his feet by trying to keep him on a partial hard surface

Make sure pen divisions are high and strong – many accidents happen with bulls trying to jump out of pens shortly after arrival

Training

Young bulls are sexually inexperienced

Using prior to sale is resisted as they become harder to handle

Try and pen bulls where they can see cows/ other bulls working

Take a mature cow to him and allow him to serve her several times

Working

Avoid overwork – young bulls are enthusiastic but have low semen reserves

Target 20 cows in the first season

Try and get him to take a bit of supplementary feed to maintain body condition score around 3

Remove from cows if it is apparent condition is being lost – it will only lead to barren cows

Check he is serving correctly (20-40% of bulls could be infertile or sub-fertile) so keep a watchful eye and check herd 3 weeks later. If in doubt, pull him out. It is essential to PD cows after bull removed from herd

“Provide him with human contact and allow him to see his surroundings”

Annually (for all bulls)

Being fertile one season is no guarantee. Prior to the next season do bull “MOT” and fertility check in conjunction with vet

Do not trim feet just before use – plan for 6-8 weeks before. Feet and legs do a lot of work in mating season

Feed 2-3kg concentrates per day prior to mating season to build condition ready for an active season

Adapted from “Bull Selection Made Simple – A Guide for the Commercial Buyer” published 2011 by SAC & QMS

Vendors' Index & Herd Health Summary Brecon February 2018

The Vendors' Index includes a condensed version of the Herd Health information submitted at point of entry by the vendor. For further information, please see Explanatory Notes & copy of Herd Health Declaration form also included in the catalogue.

NOTES

CONDITIONS OF SALE

1. The highest bidder shall be the purchaser and if any dispute shall arise between two or more bidders, the lot in dispute is to be put up again at the sum last bid or the Auctioneers may declare the purchaser.
2. The bidding is to be ruled by the auctioneers who may without giving any reason refuse to accept the bid of any person.
3. No person shall retract a bid without permission of the Auctioneers, who reserves the right to himself of refusing a bid, and also the right of withdrawing any lot or lots from the sale.
4. No bidder may advance less at a bid than the sum named from time to time by the Auctioneers.
5. The Purchaser must declare their name and address and if required to, pay the Auctioneers or his clerk the amount of purchase money immediately on the fall of the hammer. In default of which the lot or lots shall be offered again and re-sold, and under no circumstances must any lot be removed without first obtaining a pass from the clerk.
6. Title to each asset sold will only pass on payment in full by the Purchaser. Purchasers' attention is drawn to the Retention of Title clause 20.7 on the Conditions of Sale recommended for use in livestock auction markets by the Livestock Auctioneers Association as displayed in the sale office.
7. The Auctioneers reserve the right of deviating from the catalogue either by amalgamation or dividing the lots, as circumstances may require, and also by deviating from the order of sale.
8. The lots are to be under the immediate care of the Purchasers who must take the same with all faults, imperfections and errors of description (if any) and remove the same at their own expense and risk, and no purchaser shall be allowed to remove lots from the premises until the whole of the purchase money is paid.
9. All statements contained in this catalogue as to the authenticity, genuineness, date, age, condition, or quality of any lot are statements of opinion and are not taken as to implying, statements or representations of fact.
10. Intending purchasers must satisfy themselves by inspection as to all such matters as to the physical description of any lot.
11. Neither the Vendor(s) of any lot nor the Auctioneers make or give any representation or warranty as to fitness for purpose or the quality of lots sold.
12. If any lots are described at the time of sale as in 'working order' such lots shall have no defect which renders them incapable of the reasonable work for which they are intended and they must be capable of performing such work.
13. The Purchaser is to make good any damage done to the premises by the removal or otherwise of any lot or lots.
14. The Purchaser shall not be entitled to any right of "Set Off" against the Vendor or the Auctioneer.

15. In the case of lots upon which there is a reserve, the Auctioneers shall have the right to bid on behalf of the seller.
16. Upon failure to comply with the above conditions, the uncleared lots will be re-sold either or by public or private sale and the deficiency (if any) and all expenses attendant thereon, shall be made good by the defaulters at this auction, who shall have no claim for any surplus that may arise.
17. The Auctioneers may rescind any sale within 3 hours of the final lot being sold if the lot has been sold under reserve. In the event of such rescission the purchase price or any part already paid by the Buyer shall be repaid but the parties and the Auctioneers shall be under no further liability to each other.
18. **LIVESTOCK.** ALL LIVESTOCK ARE SOLD WITH THE WARRANTIES AND RESPONSIBILITIES AS LISTED IN THE CONDITIONS OF SALE FOR CATTLE, CALVES, SHEEP AND PIGS AT LIVESTOCK AUCTION MARKETS RECOMMENDED FOR USE BY THE LIVESTOCK AUCTIONEERS ASSOCIATION WHICH ARE DISPLAYED IN THE AUCTIONEER'S OFFICE AT THIS SALE UNLESS SPECIFIC BREED SOCIETY OR NBA CONDITIONS APPLY IN WHICH CASE THEY TAKE PRIORITY.
19. **COMPLIANCE WITH ROAD TRAFFIC ACTS**
The Purchaser of any vehicle or trailer is responsible for complying with all legal requirements as to the construction and the use of such vehicle or trailer and for obtaining all certificates, permits or other authorisations necessary before such vehicle or trailer can be used on the road.
20. **HEALTH AND SAFETY AT WORK ACT 1974 AND ALL OTHER ACTS AND REGULATIONS APPLICABLE TO FARM SAFETY**
The Purchaser of any lots is responsible for complying with all legal requirements as the safe use of lots purchased at the sale and shall ensure compliance with all relevant legislation relating to the safe use of such lots.
21. **TRADE DESCRIPTIONS ACT 1968**
The Vendor is reminded that under the terms of the Traders Description Act 1968 the Vendor of any lots to which a false description is applied may be guilty of a criminal offence punishable by fine or imprisonment.

MEMBER'S ACCOUNTS REGULATIONS 1993
NOTICE REQUIRED UNDER REGULATION 2A

This sale is not required to comply with the requirements of the Member's Accounts Regulations of the Royal Institution of Chartered Surveyors.
