# SALE NOTES

## SALE STATUS

**British Limousin Cattle Society Breeders' Sale held under BLCS Auction Rules and subject to the recommended Conditions of Sale of the National Beef Association**

No substitution Bulls/animals will be accepted other than those in the catalogue. Any other Bulls/animals, not in the catalogue will go at the end.

## ENTRY FEES

To be Sold under Conditions of Sale according to NBA Rules and Breeding Warranties. Entry Fee £15 per Animal or Cow & Calf. The South Western Limousin Cattle Breeders' Club welcomes entries from Breeders from other Clubs.

All vendors need to pay the £15 subscription to the South West Limousin Cattle Breeders Club. Failure to do so may lead to non-acceptance of entry. The original pedigree certificate must accompany the entry.

## TIMES

The sale will commence at approx. 11.30am in Ring 1 following the weekly sale of Store Cattle.

## TRANSFER FEES

Pedigree certificates will be transferred to purchasers free of charge by the British Limousin Cattle Society following the sale. For any Pedigree or Membership enquiries, please contact British Limousin Cattle Society Tel: 02476 696500

## ORDER OF SALE

The Sale will commence with the Females followed by the Bulls. All cattle will be sold in guineas (£1.05). All bulls will be subject to an upset price of 2000 guineas and all females will be subject to an upset price of 800 guineas.

## REGULATIONS

All the animals will be sold subject to their individual breed society rules and regulations. **To be Sold under Conditions of Sale as recommended by NBA Rules and warranties.**

## VET INSPECTIONS

**All BULLS will be vet inspected.**

## UNLOADING

Cattle must be on the premises by 9.00am on the day of the sale. Overnight accommodation for cattle prior to sale can be made available by arrangement with the auctioneers.

## BIO-SECURITY

A strict bio-security plan will be in operation. Please arrive with clean clothes, and/or waterproof clothing and wellington boots.

## FOREWORD

Kivells are delighted to be conducting this very special sale of Pedigree Limousin Cattle on behalf of the South Western Limousin Breeders Club at Exeter Livestock Centre. This catalogue represents a tremendous opportunity for buyers looking for quality pedigree Limousin cattle whether it be well-bred stock bulls or females to establish a foundation family. The sale includes 8 Bulls, 12 Cows with Calves at foot, 6 In-Calf/Served Cows & Heifers, 16 Maiden Heifers and 2 Embryos in recipient heifers from the following Herds: Exmoor, Highridge, Holwellbarton, Killerton, Loosebeare, Sidborough, Sloughpool, Smithy, Timberlands & Timberscombe. With something for everyone, this sale is not to be missed!

## SALE CONTACTS

**Kivells** 01392 251261 (Office) livestock@kivells.com

### Auctioneers:

Mark Davis - 07773 371774

Mark Bromell - 07966 430001

## TERMS

All cattle entered for the sale will have their identification marks examined. Any marks found to have faulty, incorrect or illegible marks will be REJECTED from the sale. Vendors are therefore urged in their own interest to examine the tattoo marks/tags of sale cattle before the animal(s) leave the farm, so that faulty marks can be rectified in accordance with the required society procedures.

All bulls and haltered females entered for the sale must be adequately trained to lead by halter and must be paraded for inspection – unless exempted by the Stewards. Evidence of faults of temperament, vices, etc, may lead to disqualification.

Any disputes that may arise between vendor and purchaser will not involve the Club.

---

## LIMOUSIN PERFORMANCE RECORDING

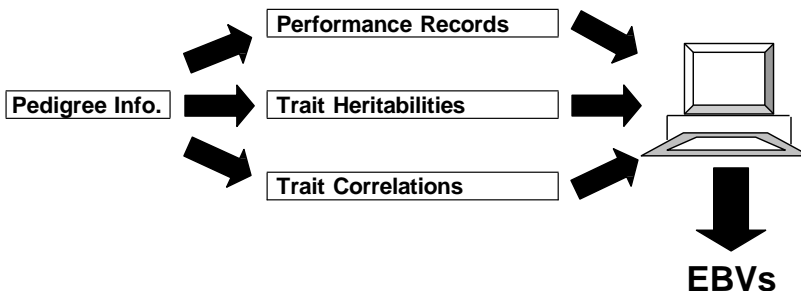

### HOW TO USE LIMOUSIN BREEDING VALUES

#### ESTIMATED BREEDING VALUES (EBVs) & GENOMIC BREEDING VALUES (GEBVs)

## 1. What Are EBVs?

Many factors influence the appearance and performance of a bull. For example, age, nutrition, management, age of dam, health, season, quality of farm and the genes it has inherited from its parents. The only factor that can be passed on to its calves, however, is its inherited genetic potential. Estimated Breeding Values are measures of that potential and are calculated from the following:

- Measurements from the animal itself
- Measurements from the animal's herd mates (known as 'contemporaries')
- Measurements from the animal's relatives and their contemporaries
- The degree to which one trait influences another (known as a 'correlation')
- The degree to which each trait is passed on to the next generation (known as 'heritability')

## 2. What Are GEBVs?

In March 2016, Genomic Breeding Values (GEBVs) became available for all Limousin cattle for a range of new Carcase Traits. In July 2017, GEBVs also became available for three new Female Fertility traits and Calf Survival. They are the first of their kind within the UK's beef sector and are the result of five years of research between British Limousin Cattle Society, ABP Food Group and SRUC.

**GEBVs take conventional EBVs a step further by using information from animals' DNA as well as the usual measurements of performance.** To produce the breeding value the DNA is compared to a DNA 'key' for the breed:

**This key is created from** a core population of Limousin animals that have been measured on-farm and in the abattoir as well as having DNA collected

**The key is like a library** that cross refers information from the DNA strand with different levels of abattoir performance.

**GBVs are produced** by comparing the DNA of an animal with the key. They are calculated from the correspondence of that animal's DNA with those in the library

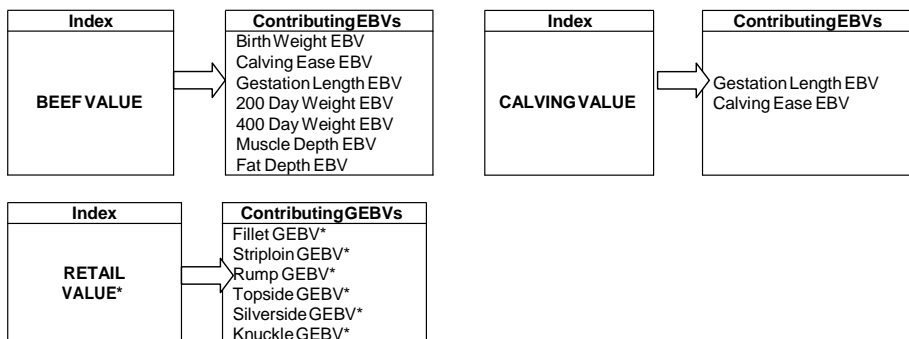

### GEBVs are used in exactly the same was as EBVs...

Albeit they are produced in slightly different ways GEBVs are in essence breeding values that indicate genetic merit as EBVs do and the way the two are used should not differ (see paragraph 5 below).

## 3. What Are Breeding Indexes?

It is often desirable to select animals on the basis of more than one EBV/GEBV. Breeding Indexes focus on specific breeding goals and combine the appropriate EBVs/GEBVs in to a single figure based on their relative economic value. This is widely regarded as the most efficient method of selecting on a number of traits at once.

Three Breeding Indexes are available at sales, as follows:

\* GEBVs available for animals that have been genotyped for this purpose and where the values have been published by the owner.

**When using an Index it is important that your breeding objective is broadly similar to that of the Index in question, otherwise you may unwittingly change aspects of your herd that you did not necessarily want to.**

## 4. What Breeding Value Information Is Available?

In sale catalogues, EBVs & GEBVs are produced for up to eighteen traits that focus on an animal's economic performance.

Trait	Breeding Value Indicates...	Look for...
<b>Birth Weight (kg)</b>	Genetic potential for calf weight at birth	<b>High negative EBVs</b> if you want low calf birth weights
<b>Calving Ease (%)</b>	Ease with which a bull's progeny will be born	<b>High positive EBVs</b> if you want less assisted calvings
<b>Maternal Calving Ease (%)</b>	Ease with which a bull's daughters will calve	<b>High positive EBVs</b> if you want less assisted calvings
<b>Gestation Length (days)</b>	Genetic potential for gestation length	<b>High negative EBVs</b> if you want short gestation lengths
<b>200 Day Milk (kg)</b>	The maternal component of 200 day growth (i.e. the contribution that the milking and maternal abilities of a bull's daughters make towards their calves' growth at 200 days of age)	<b>High positive EBVs</b> if you want daughters to wean heavier calves
<b>200 Day Weight (kg)</b>	Genetic potential for growth from birth to 200 days of age	<b>High positive EBVs</b> if you want high growth rates to weaning
<b>400 Day Weight (kg)</b>	Genetic potential for growth from birth to 400 days of age	<b>High positive EBVs</b> if you want high growth rates to finishing
<b>Muscle Depth (mm)</b>	Genetic potential for muscularity and potential to increase lean meat yield	<b>High positive EBVs</b> if you want good calf conformation
<b>Fat Depth (mm)</b>	Genetic potential for leaner carcasses	<b>Negative EBVs</b> if you want to produce leaner carcasses or take calves to heavier weights without penalty for fatness
<b>Age at 1<sup>st</sup> Calving (days)</b>	Genetic potential for early sexual maturity	<b>High negative EBVs</b> for a greater proportion of heifers that hold to 1 <sup>st</sup> service
<b>Calving Interval (days)</b>	Genetic potential for the time taken to get back in calf	<b>High negative values</b> to breed cows that get back in calf quickly
<b>Docility (%)</b>	Genetic potential for being calm when handled	<b>High positive values</b> for animals that are likely to be more calm when handled
<b>Scrotal Circumference (cm)</b>	Genetic potential for scrotal size. Linked to male serving capacity and puberty of daughters.	<b>High positive values</b> for animals with higher likely serving capacity and earlier maturing daughters.
<b>Age to Slaughter GEBV (days)</b>	Age at slaughter assuming a standard carcass weight of 350kgs	<b>High negative values</b> (less days) for animals that will reach 350 kg deadweight quicker
<b>Carcass Weight GEBV (kg)</b>	Carcass weight at a standard slaughter age of 600 days	<b>High positive values</b> for animals that will reach heavier carcass weights at 600 days of age
<b>Fillet GEBV (kg)</b>	Weight of fillet at a standard slaughter age of 600 days and carcass weight of 350kg	<b>High positive values</b> for higher fillet weights in the carcass
<b>Striploin GEBV (kg)</b>	Weight of striploin at a standard slaughter age of 600 days and carcass weight of 350kg	<b>High positive values</b> for higher striploin weights in the carcass
<b>Rump GEBV (kg)</b>	Weight of rump at a standard slaughter age of 600 days and carcass weight of 350kg	<b>High positive values</b> for higher rump weights in the carcass

**Breeding values for further traits for each animal are available on [www.taurusdata.co.uk](http://www.taurusdata.co.uk).** Enter animal name or ear number in the Quick Search box. You can also search by breeder and by breeding values ('Breeder Search' and 'EBV Search'). The additional traits available are:

- Longevity EBV & GEBV
- Silverside EBV & GEBV
- Calf Survival EBV & GEBV
- Topside EBV & GEBV
- Knuckle EBV & GEBV

# 5. How to Use the Information in This Catalogue

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average. In sale catalogues, Breed Average for each trait is represented by the vertical line that is central on the bar chart. Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are. Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are. An example is as follows:

The central line represents Breed Average for each trait

EBV & GEBV values are shown & can be used to refine comparison with the breed using the Benchmark below

Accuracy: Accuracy Values are expressed as a % and indicate the quantity and quality of records used to produce each EBV, GEBV or Index. The closer they are to 100%, the more accurate the EBV. Highly accurate values are less likely to change over time.

Adjusted weights are the 'raw' weights recorded for the animal, adjusted to the nearest 100 days. No adjustment has been made to account for the effects of the environment, feeding etc.

The numeric EBV & GEBV values on the charts can be used to further refine comparison with the breed using the Breed Benchmark below. This is updated annually.

## 2018 Limousin Breed Benchmark

## 6. Things to Consider...

- To establish just how much influence a bull will pass on to his progeny it is important to remember to halve the value of the EBV/GEBV, since the other half of a calf's genes comes from the cow.

For example, a bull with a 400-Day Growth EBV of +62 is estimated to have the genetic potential to be 62kg heavier at 400 days of age compared to a bull with an EBV of 0. His calves would be expected to be 31kg heavier at that age when compared to calves by a bull with an EBV of 0, since they only inherit half of their growth genes from their sire (the other half coming from their dam).

- Select animals using EBVs/GEBVs that are relevant to your farm, cow type and market

- Bear in mind that EBVs/GEBVs predict an animal's economic performance. They are no judge of factors such as soundness, locomotion, breed type etc and you must be satisfied with your potential purchase in these respects too.
- Consider the traits that will make you most money, but
- Don't forget to check traits you may be compromising in pursuit of your goals, such as Calving Ease etc
- EBVs/GEBVs change as time goes on. New calves and new performance records tell us more about animals' breeding potential. Limousin EBVs/GEBVs are updated three times per annum and all values will change as more information is added and the accuracy of the predictions increases.

## 7. EBV/GEBV & Pedigree Info Just a Click Away

EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...

**Step 1:** Click the 'Taurusdata Online Herd Book' button on the Limousin Society homepage ([www.limousin.co.uk](http://www.limousin.co.uk)) or go direct to [www.taurusdata.co.uk](http://www.taurusdata.co.uk)

**Step 2:** In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

## 8. Further Information

For further information, please contact Alison Glasgow, British Limousin Cattle Society on telephone 02476 696500, e-mail [alison@limousin.co.uk](mailto:alison@limousin.co.uk) or visit the BLCS web site [www.limousin.co.uk](http://www.limousin.co.uk), 'Performance Programmes'.

**DIRECTIONS:**

**From the M5:** Exit Junction 30, at the roundabout follow the A379 Exeter/Dawlish road and take the slip road signed Marsh Barton/Dawlish. Continue straight through the Countess Wear roundabout, over the Swingbridge taking the right hand lane on approach to the Matford roundabout following the sign to Marsh Barton. At the Devon Hotel roundabout take the third exit onto Marsh Barton/Bad Homburg Way. Exit first left at the next roundabout, continue over the second mini roundabout and take the first left to The Matford Centre.

**From A38 Plymouth:** Exit at A379 for 1.7 miles. Take second exit at the roundabout onto B3123 Bad Homburg Way. Exit first left at next roundabout and The Matford Centre is 200 metres on left.

**From A30 Cornwall:** Exit A377 Exeter. Follow City A377 through first road junction. Turn right, signed Marsh Barton, and follow signs to Livestock Centre.

**EXETER LIVESTOCK CENTRE**

Matford Park Road, Exeter, Devon, EX2 8FD
