

'Limousin Day'

British Limousin Cattle Society Breeders Sale on behalf of
The East Midlands Limousin Cattle Breeders Club and
The North West Midlands & North Wales Limousin Cattle Breeders Club

**133 HEAD
OF PEDIGREE LIMOUSIN CATTLE**

Cockleshell Vienna 4,500gns

Saturday 5th October 2013
commences 12 noon

to be held at

NEWARK LIVESTOCK MARKET

Great North Road, Newark,
Nottinghamshire, NG24 1BY

NEWARK
LIVESTOCK MARKET

Mole Valley
Farmers

**Owned by farmers
for farmers**

Molemec Cattle Pour on

**Available exclusively from Mole Valley Farmers,
the UK's largest Agricultural and Rural Retailer.**

- Molemec Cattle Pour On – For the treatment and control of gastro-intestinal nematodes, lungworms, warbles, chorioptic and sarcoptic mange mites and sucking and biting lice of beef and non-lactating dairy cattle.
- Manufactured by the producers of the original ivermectin
- Demonstrating commitment to Quality & Efficacy at competitive prices

“The Molecare concept underlines our commitment to farming, offering a trusted brand, quality products and value for money. Molemec is the first brand of our own brand range of medicines. It is a tried and tested formula and we are delighted to be able to offer our customers quality at a very competitive price.”

LIMOUSIN DAY

PLEASE BRING THIS CATALOGUE TO THE SALE

Catalogue
on behalf of

The East Midlands Limousin Cattle Breeders Club and The North West Midlands and North Wales Limousin Cattle Breeders Club

*subject to the recommended Conditions of Sale of the National Beef
Association*

on

Saturday 5th October 2013 at 12 noon

at

Newark Livestock Market

133 HEAD OF PEDIGREE LIMOUSIN CATTLE

Comprising:

19 Pedigree Limousin Bulls
35 Pedigree Limousin Cows In calf
including 27 with Pedigree Limousin calves at foot
7 Pedigree Limousin In calf Heifers
45 Pedigree Limousin Maiden Heifers

Also this day:

4 Pedigree Limousin Frozen Embryos
408 Straws of Pedigree Limousin Semen
1 Pure Limousin In calf Heifer
10 Limousin Commercial Heifers
3 Limousin Commercial Steers

Also this day, Sale of Store and Breeding Cattle, Sheep, Pigs, Reared and Rearing calves
Entries Invited!

Important Notice to
Prospective Purchasers

Settlement & Clearance of Stock

***Please note that all lots MUST be settled
on the day of purchase***

- *Completion of a buyers slip is essential for parties who have not dealt with the company before*
- *New customers and agents wishing to Purchase on behalf of another party must contact the company's main office 48 hours prior to a sale*
- *No Lots can leave the premises without a 'Pass slip' being issued by the main office*

LIMOUSIN DAY

Newark Livestock Market Limited
IMPORTANT NOTICE TO PROSPECTIVE PURCHASERS

All Lots must be settled on the day of purchase

Parties who have not dealt with the company before should complete the undernoted form and hand it in to the 'auctioneers' clerk when a purchase is made.

Alternatively it can be sent to the main office in advance of the sale.

GENERAL INFORMATION & SALE NOTES

LOCATION: The sale will be held at Newark Livestock Market, Great North Road, Newark, Nottinghamshire, NG24 1BY Tel:01636 676741 Fax:01636 611190
Email: enquiries@newarklivestocksales.com Website: www.newarklivestocksales.com

ACCOMMODATION: Please see a list of local Hotels and Bed & Breakfast on page 4.

CONDITIONS OF SALE: The auction Rules and Conditions of Sale drawn up by the N.B.A. This Sale is held subject to these rules and the Auctioneers' General Conditions of sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A. Conditions of sale shall prevail.

METHOD OF SALE: All Pedigree cattle will be sold in guineas (105 pence) and in strict catalogue order, unless any alterations are announced by the auctioneers. Commercial Cattle will be sold in £'s per head.

COMMISSIONS: The auctioneers will dutifully execute commission to purchase for buyers unable to attend the sale personally, upon the receipt of written instructions.

SETTLEMENT AND CLEARANCE OF STOCK: Settlement in full is due immediately at the close of the Sale. No Animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement. Purchasers unable to remove their stock on the day of sale can arrange overnight accommodation with the Auctioneers on the understanding that all cattle are at Purchasers' risk.

REGISTRATIONS: All Pedigree stock in the sale are registered with the British Limousin Cattle Society, Concorde House, 24 Warwick New Road, Leamington Spa, Warwickshire. CV32 5JG (Tel 02476 696500)

PEDIGREE TRANSFERS AND FEES: All animals are eligible for transfer at the purchasers expense.

INSURANCE: Please refer to page 8.

SEMEN ROYALTY SCHEME BULL REGISTER: Purchasers are asked to note that where a female is catalogued as being served/inseminated by a 'Semen Royalty' Sire. The appropriate royalty will be payable by the purchaser prior to registration of the calf.

VETERINARY INSPECTION: For the buyer's convenience, a Veterinary Inspection will be carried out on all bulls entered for the sale. A Veterinary Officer will examine general health and genetic defects particularly teeth, eyes, testicles, warts and locomotion. Any animal found with a genetic fault, disease or disorder will be rejected.

HERD HEALTH: as stated declared by the vendor in catalogue or from the rostrum.

LIMOUSIN DAY
THE BRITISH LIMOUSIN CATTLE SOCIETY

LIMOUSIN
THE CARCASE BREED

IT IS ESSENTIAL THAT THE FOLLOWING DOCUMENTS ACCOMPANY ANIMALS TO THE SALE PREMISES AND ARE HANDED TO THE LIVESTOCK OFFICE UPON ARRIVAL TO THE MARKET DECLARATION FORM (Subject to DEFRA regulations) TOGETHER WITH THE NECESSARY CATTLE PASSPORT DOCUMENTATION

IMPORTANT NOTICE TO PURCHASERS

1. This Sale is held subject to recommended Conditions of Sale of the National Beef Association.
2. This Sale is held subject to the Special Terms and Conditions of Sale recommended for Sales of Pedigree Beef Cattle by the National Beef Association. The preparation of these Terms and Conditions has proved a lengthy and costly process and, in order to defray the legal and other costs involved, and to provide a continuing source of revenue to assist the Association in its vital work for pedigree cattle breeders, the Council of the Association has decided that a special levy, amounting to £4 per male and £2 per female head/lot sold (plus VAT) shall be charged to each Purchaser.

This levy will be imposed at this Sale and added to Purchaser's accounts.

LIMOUSIN DAY

ANY ANIMAL NOT IN POSSESSION OF THE REQUIRED DOCUMENTS WILL NOT BE OFFERED
FOR SALE WITHOUT THEIR RETROSPECTIVE PASSPORT DOCUMENTATION

Important Notice to Vendors

TIMETABLE OF EVENTS:

FRIDAY 4th OCTOBER

12 noon until 7pm ARRIVAL OF STOCK

INSPECTION OF BULLS 5 – 6pm

SATURDAY 5th OCTOBER

5am to 8am ARRIVAL OF STOCK

INSPECTION OF BULLS 8am to 9am

JUDGING COMMENCES 9am

12 noon SALE COMMENCES

EVERY BULL entered for the Sale, MUST BE ADEQUATELY TRAINED TO LEAD BY HALTER. All bulls must be provided with a serviceable halter, which will become the property of the purchaser.

TATTOO MARKS/UK TAGS – All cattle entered for the Sale will have their tattoo marks/UK Tags examined as an integral part of the pre sale inspection procedure. Any marks found to have faulty, incorrect or illegible marks will be REJECTED from the Sale. Vendors are therefore urged, in their own best interests, to examine the tattoo marks of Sale cattle before the animal(s) leave their holding, so that faulty marks can be rectified in accordance with the required Society procedures.

The Sale will be held subject to the Auction Rules, Conditions of Sale.

The proceeds of sale are guaranteed by the Auctioneers, who will account to Vendors on the day of the Sale. Such guarantee, however, does not extend to the animals sold for export, to which special conditions apply.

UPSET PRICES – There will be an 'Upset' price of 1200 guineas on each bull presented for sale – ie: If no opening bid of 1200 guineas is received for any particular lot, that lot will be passed out of the ring unsold. There will be no 'upset' price on females.

RESERVE PRICES: Vendors shall have the right to refuse to accept the final bid for their animals. The auctioneers reserve the right to charge half commission on the amount of the final bid in the case of animals which fail to reach the Vendors reserve price.

All Pedigree animals will be sold in guineas (105 pence) and a commission of 5% will be charged by the auctioneers on all sales. No animal may be sold privately before passed through the auction ring and FULL COMMISSION will be charged on the sale of any animal sold by private treaty after the auction. All such transactions MUST BE PASSED THROUGH THE AUCTIONEERS OFFICE.

STRAW: Straw will be provided by the auctioneers free of charge.

ANIMAL WELFARE: Vendors and Purchasers should note the CODE OF PRACTICE published by the Livestock Auctioneers' Market Committee for England and Wales IS OPERATIVE and that weakly, unhealthy or injured stock will be refused entry by the Auctioneers. Enquiries should be directed through the market office to the Auctioneers' ANIMAL HEALTH & WELFARE OFFICER.

AGRIDIRECTINSURANCE

LIMOUSIN
THE CARCASE BREED

INSURANCE

Due to the fact that a Veterinary Inspection has been carried out on sale animals for the buyer's convenience, purchasers are reminded that Taurus Insurance are present at the Sale and respectfully ask that you consider using them for your sale insurance needs. Insurances are provided by Crowe Livestock Underwriting Ltd.

COVER AVAILABLE FOR PURCHASERS

Bulls up to 4 years of age

All Risks of Mortality (as per LMA 3093) & Bull Loss of Use (Accident, Sickness and Disease)
Extension CLUL 10b

RATES

All Risks of Mortality (as per LMA 3093) & Bull Loss of Use (Accident, Sickness & Disease) Extension CLUL 10b	Value up to and including £10,000	Value £10,000 - £15,000
3 months	7.00%	7.50%
6 months	10.00%	10.50%
12 months	12.00%	12.50%

Cows & Heifers Up to 7 years

All Risks of Mortality (as per LMA 3093). Please note for females if cover is required for a period of less than 6 months, cover will exclude all losses as a direct or indirect result of calving. Losses to cows as result of calving are included in the All Risks of Mortality rates for 6 or 12 months.

RATES

All Risks of Mortality (as per LMA 3093):	Value up to and including £10,000	>£10,000
3 months (excludes death as a result of Parturition)	2.70%	3.40%
6 months (includes death as a result of Parturition)	4.50%	6.00%
12 months (includes death as a result of Parturition)	6.00%	7.50%

CALVES

12 months All Risks of Mortality (as per LMA 3093). Age 24 hours to 13 days **8.00%**.
Age 14 days to 3 months **7.00%**.

A minimum and retained premium of £150 will apply to all Policies.

Please note that 6% Insurance Premium Tax is to be added to all Premiums.

Copies of policies, where appropriate, will be forwarded to purchasers after the sale.
In the event of any queries, please telephone Taurus on 02476-696516 or speak to Richard Saunders (0784-3336213) at the Sale.

A User's Guide to Estimated Breeding Values

Contents

1. Estimated Breeding Values (EBVs)
2. How are EBVs Calculated?
3. Breeding Indexes
4. Accuracy
5. EBV Indexes
6. 200 Day Milk
7. How to Use EBVs and Indexes
8. Understanding Sale Cards and Catalogues
9. EBVs and Pedigrees Just a Click Away
10. Further Information

1. Estimated Breeding Values

Many factors influence the appearance and performance of a bull, so selecting 'by eye' alone can be misleading. The only accurate way of assessing the genetic potential of an animal (i.e. what it can pass on to its calves) is by using Estimated Breeding Values (EBV's) and Indexes. These are produced by Signet using a system known as BLUP (Best Linear Unbiased Predictor) and are calculated from animals' individual performance records as well as those of all their known relatives, where the effects of the environment (feeding, management, disease, climate etc) are sifted out to leave an estimate of the genetic value for each trait, as follows...

EBV	What Does the EBV Indicate?	Look for...
Birth Weight (kg)	Genetic potential for calf weight at birth	High negative EBVs if you want low calf birth weights
Calving Ease (%)	Ease with which a bull's progeny will be born	High positive EBVs if you want less assisted calvings
Maternal Calving Ease (%)	Ease with which a bull's daughters will calve	High positive EBVs if you want less assisted calvings
Gestation Length (days)	Genetic potential for gestation length	High negative EBVs if you want short gestation lengths
200 Day Milk (kg)	The maternal component of 200 day growth (i.e. the contribution that the milking and maternal abilities of a bull's daughters make towards their calves' growth at 200 days of age)	High positive EBVs if you want daughters to wean heavier calves
200 Day Weight (kg)	Genetic potential for growth from birth to 200 days of age	High positive EBVs if you want high growth rates to weaning
400 Day Weight (kg)	Genetic potential for growth from birth to 400 days of age	High positive EBVs if you want high growth rates to finishing
Muscle Depth (mm)	Genetic potential for muscularity and potential to increase lean meat yield	High positive EBVs if you want good calf conformation
Fat Depth (mm)	Genetic potential for leaner carcasses	High negative EBVs if you want to produce leaner carcasses or take calves to heavier weights without penalty for fatness
Age at 1st Calving (%)	Genetic potential for early sexual maturity	High negative EBVs for a greater proportion of heifers that hold to 1 st service

LIMOUSIN DAY

Longevity (years)	Genetic potential for long life in the breeding herd	High positive values for animals likely to remain in the herd for longer
Calving Interval (days)	Genetic potential for the time taken to get back in calf	High negative values to breed cows that get back in calf quickly
Dolcility (%)	Genetic potential for being calm when handled	High positive values for animals that are likely to be more calm when handled
Scrotal Circumference (cm)	Genetic potential for scrotal size. Linked to male serving capacity and puberty of daughters.	High positive values for animals with higher likely serving capacity and earlier maturing daughters.

2. HOW ARE EBVs CALCULATED?

EBVs are calculated using information from several sources:

- Measurements from the animal itself
- Measurements from the animal's herd mates (known as 'contemporaries' *)
- Measurements from the animal's relatives and their contemporaries
- The degree to which one trait influences another (known as a 'correlation' *)
- The degree to which each trait is passed on to the next generation (known as 'heritability' *)

* Terms explained below

Heritability and Correlations

Heritability

This is a term used to describe the strength with which traits are inherited and it varies depending on the trait in question. Generally:

- Traits associated with reproduction and survival have low heritabilities
- Milk production and early body size have medium heritabilities

LIMOUSIN DAY

- Later growth and carcass traits (i.e. fat and muscle) have relatively high heritabilities

Where traits with relatively good heritability are concerned, when something is known of the performance of one or both parents, then a prediction can be made as to how the offspring will perform and BLUP uses this 'knowledge' to enhance the accuracy of its EBV calculations.

Correlations

This term describes the direction and strength of the association between two traits. For example, some traits are highly positively correlated, such as 200-Day Growth and 400-Day Growth, whilst others are highly negatively correlated, such as 400-Day Growth and Calving Ease. When something is known of one trait but perhaps not another, a prediction can be made based on what is known about the correlation between them. This again enhances the accuracy of the EBV in question and helps deal with situations where records for a trait are limited or unavailable.

3. BREEDING INDEXES

It is often desirable to select animals on the basis of more than one EBV. Indexes focus on specific breeding goals and combine the appropriate EBVs in to a single figure based on their relative economic value. This is widely regarded as the most efficient method of selecting on a number of traits at once.

Signet currently produces three beef Indexes, as follows:

When using an Index it is important that your breeding objective is broadly similar to that of the Index in question, otherwise you may unwittingly change aspects of your herd that you did not necessarily want to.

4. ACCURACY

An Accuracy Value is published next to every EBV and Index. Accuracy Values are expressed as a % and indicates the quantity and quality of records used to produce the EBV or Index.

Several things affect the accuracy of an EBV or Index, namely:

- The amount of information on the trait from the animal itself
- The amount of information on the trait from relatives of the animal

LIMOUSIN DAY

- The heritability of the trait concerned
- The amount of information from the animal and its relatives on traits correlated with the trait of interest and the strength of the correlations which vary between different traits.
- The number of herd mates from the same management group recorded ('contemporaries').

Scaling for Low Accuracy

An important feature of BLUP EBVs is that they are scaled to account for the amount of performance information on which they are based. EBVs based on very little information get adjusted towards the average EBV and this adjustment applies to both high and low EBVs.

This prevents animals gaining very high or very low EBVs as a result of a few very good or very poor records and is designed to protect the user from risk. The more information available on an animal and its relatives, the less the EBVs are adjusted.

Accuracy Values indicate how similar an animals' EBVs are to its true breeding value. They predict the likelihood that an animals EBVs will change over time

5. EBV INDEXES

To aid interpretation at breed sales, all Limousin EBVs are presented in index form based around an average of 100 with an approximate range of 70 to 130. For example:

	Calving Value	200 Day Milk (kg)	200 Day weight (kg)	400 Day weight (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
EBV	LM -4C	-1	+25	+34	+3.40	-0.20	LM +23
Accuracy %	85	54	75	73	68	66	73
Index	77	98	112	106	111	111	108

Below average

Above average

6. MATERNAL EBVs

Many commercial and pedigree producers are breeding their own female replacements and need to identify bulls with superior maternal attributes.

200 Day Milk EBV

One of the most important maternal EBVs is the 200 Day Milk EBV – indicating the degree to which 200 day milk is influenced by maternal performance – e.g. milkiness and general mothering ability.

As well as predicting breeding potential for growth to 200 day of age, the 200 day weight can be used to assess an animals breeding potential for milking ability.

Consider the performance of the grand-offspring of a bull. The weights of all of his grandprogeny are influenced by his growth genes, but only those produced by his daughters are affected by his genes for milk.

If the grandprogeny produced by his daughters are constantly heavier than those produced by his sons, then this is likely to be due to his superior genes for milk production.

Interpretation

A bull with an EBV of +4 for 200-Day Milk is expected to produce heifer calves which will have above average maternal characteristics leading to their calves being 2kg heavier at 200-days than calves from heifers sired by a bull with an EBV of 0.

LIMOUSIN DAY

Maternal Calving Ease

This EBV predicts how easily a bull's daughters will calve. It should not be confused with the Calving Ease EBV which predicts how easily a bull's progeny will be born.

The Maternal Calving Ease EBV is calculated from calving records and is expressed as a % indicating the proportion of unassisted calvings.

Interpretation

A bull with a Maternal Calving Ease EBV of 2% will produce females that have 1% more unassisted calvings than a bull with an EBV of 0.

EBVs are also produced for: Longevity, Age at First Calving and Calving Interval but these are not yet published at breed sales.

7. How to Use EBVs and Indexes

EBVs are expressed in the same unit as the recorded trait (e.g. kg for 400-Day Weight, mm for Muscle Depth etc) and are relative to a Breed Benchmark, which is updated and published annually.

Limousin Breed Benchmark 2013

Trait	BOTTOM			AVERAGE	TOP		
	1%	10%	25%		25%	10%	1%
Gestation Length (days)	3.7	1.9	1.2	0.5	-0.2	-1.0	-2.6
Calving Ease (%)	-8.4	-4.7	-3.3	-2.3	-1.1	-0.3	1.0
Maternal Calving Ease	-1.0	-0.2	0.2	0.6	1.0	1.2	1.7
Birth Weight (kg)	3.4	2.4	1.9	1.3	0.9	0.4	-0.4
Calving Value	LM-4C	LM-2C	LM-1C	LM0C	LM1C	LM2C	LM4C
200-Day Milk (kg)	-6	-3	-2	-1	1	2	5
200-Day Weight (kg)	-4	6	12	17	25	32	45
400-Day Weight (kg)	-4	13	22	30	43	55	77
Muscle Depth (mm)	-0.7	0.6	1.2	2.1	3.1	4.1	6.0
Fat Depth (mm)	0.4	0.1	0.0	-0.1	-0.2	-0.3	-0.6
Beef Value	LM6	LM13	LM16	LM20	LM26	LM31	LM41
Maternal Value	LM-21V	LM-9V	LM-3V	LM4V	LM9V	LM16V	LM28V

When using EBVs it is important to remember that although they can be compared between herds, they can not be compared between breeds.

LIMOUSIN DAY

Using the Breed Benchmark, compare and contrast the EBVs and Indexes of the two young bulls below.

Bull A

Analysis Date	Calving Value	200 Day Milk (kg)	200 Growth (kg)	400 Growth (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
24/10/2008	LM1C	4	28	42	4.1	-0.1	LM27
EBV							
Accuracy %	57	42	72	69	69	62	63
Index	100	120	122	117	128	103	120

100 day wt	200 day wt	300 day wt	400 day wt	500 day wt	Scanned
118	253	378	556	710	Yes

Signet
MLC's Signet Breeding Services

Bull B

Analysis Date	Calving Value	200 Day Milk (kg)	200 Growth (kg)	400 Growth (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
24/10/2008	LM4C	-5	30	52	2.0	0.3	LM25
EBV

Index	120	86	124	125	107	76	116

100 day wt	200 day wt	300 day wt	400 day wt	500 day wt	Scanned
126	256	385	568	755	Yes

Signet
MLC's Signet Breeding Services

- Each bull has been fully weight recorded (i.e. they both have a complete set of 100-day adjusted weights), scanned (the box says 'Yes') and possesses satisfactory accuracy figures, given their age.
- Both bulls have EBVs for growth and carcase traits that are above the breed average, but in several ways their characteristics differ:
 - > Bull A has a higher Muscle Depth EBV
 - > Bull B has the highest EBVs for growth rate (weight) EBVs
 - > Bull A has a 200-Day Milk EBV in the Top10% of the breed
 - > Bull B has a Calving Value in the Top 10% of the breed

Bull A would be the most suitable out of the two for a unit where conformation takes high priority. The high 200-Day Milk Weight EBV would also make it suitable for herds where female replacements are retained for breeding.

The high Calving Value of Bull B indicates that it would be more suitable for mating to heifers. It could also be used in herds where a priority is to improve growth.

Remember

When trying to establish just how much influence a bull will pass on to his progeny it is important to remember to halve the value of the EBV, since the other half of a calf's genes comes from the cow.

For example, a bull with a 400-Day Growth (weight) EBV of +62 is estimated to have the genetic potential to be 62kg heavier at 400 days of age compared to a bull with an EBV of 0.

Based on their sire's genetics, his calves would be expected to be 31kg heavier at that age when compared to calves by a bull with an EBV of 0, since they only inherit half of their growth genes from their sire (the other half coming from their dam).

LIMOUSIN DAY

8. UNDERSTANDING SALE CARDS AND CATALOGUES

Estimated Breeding Values on Sale Cards

EBVs and Indexes are produced on sale cards as shown below:

Bars that lie to the right of the central line indicate the EBV/Index is above breed average (and the further it is to the right, the higher above breed average it is). Similarly, bars to the left of the central line indicate the EBV/Index is below breed average (and the further to the left it is, the further below average it is).

In sale catalogues, the same figures are produced in table format similar to the examples of Bull A and Bull B above. The EBV Index (bottom line) will quickly indicate where values lie in relation to the breed average. The Breed Benchmark printed in the front pages of the catalogue will allow further refinement of this.

9. EBV and PEDIGREE INFORMATION JUST A CLICK AWAY

EBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Click the 'Basco Online Herd Book' button on the Limousin Society homepage (www.limousin.co.uk)

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its EBVs, its pedigree and list its progeny with full links to all of their information.

10. FURTHER INFORMATION

For further information, please contact Alison Glasgow, British Limousin Cattle Society on telephone 01721 730664, e-mail alison@limousin.co.uk or visit the BLCS web site www.limousin.co.uk

Tomschoice Hurricaine has been used on a small group of Cows over the summer.

Tomschoice Hurricaine is maternal brother to **Tomschoice Gladstone**, sold Carlisle October 2012 for 10,000gns.

Semen Tested. DNA parentage verified. Carries 2 copies of the F94L gene.

EBV: Top 1% for Gestation Length, 200 & 400 day weight gain and Beef Value.

Top 10% for Calving Value.

Video at www.limousins.com

Kaprico Eravelle was a 1st prize winner when purchased from Carlisle, February 2011 9,000gns. He was subsequently chosen for the BLCS/Signet Young Bull Proving Scheme. He has proved to be a very easy calving sire with an EBV in the top 1% for gestation and calving value. He is also in the top 1% for 400 day weight.

Hawk sired over 300,000 progeny in his lifetime and has left a legacy behind him.

Hawk offers style and conformation combined with good temperament and calving ease. His progeny have superb show winning qualities, topping sales including Smithfield on numerous occasions.

LIMOUSIN DAY

The following straws of semen are for sale by Calogale Beef Semen-Sales and take pride in despatching semen within 48 hours, the purchaser's receipt will be passed to Calogale Beef Semen-Sales and they will arrange the transfer.

The transfer costs are strictly to be paid for by the purchaser.

Payment for Semen will not be made until the purchaser is in receipt of stock.

Commission bids are welcome, please contact Paul Richardson on 01636 676741.
