GENERAL INFORMATION AND SALE NOTES

LOCATION:

The Show and Sale will be held at Brecon Livestock Market, which lies conveniently on the last roundabout of the Brecon bypass (off the A40 Llandovery road) and is signposted there from.

TIMINGS:

The show will commence at 9.30 am followed by the sale at 12 noon.

CONDITIONS OF SALE:

The sale will be held under the BLCS Auction Rules, and subject to the recommended Conditions of Sale of the N.B.A. Bulls will be sold under BLCS Collective Sale Rules. Females will be sold under BLCS Breeders' Sale Rules.

METHOD OF SALE:

All cattle will be sold in guineas (105p)

PEDIGREE TRANSFERS:

The pedigree transfers will be dealt with by the Society following the sale.

SETTLEMENT & CLEARANCE OF STOCK:

Settlement in full is due to the Auctioneers at the close of the sale. Any purchasers not known to the Auctioneers must supply a satisfactory reference before removing any stock from the premises.

T.B. PRE-MOVEMENT TESTING:

As from 1st March 2007 all cattle aged 42 days and over are required to be TB tested (and be negative) within 60 days of proposed movement, if they are destined for further breeding/fattening. (i.e. Breeding stock, Store stock) and are in a 1 or 2 year testing parish. If cattle are on farms that are 3 or 4 year testing, they do not need to be tested. ALL CATTLE FROM WALES MUST BE PRE-MOVEMENT TESTED REGARDLESS OF AREA

DELIVERY OF STOCK

Stock may be delivered to the Market:

Friday, 8th NOVEMBER 11.00am – 4.00 p.m.
INSPECTIONS commence 2.00pm – 5.00pm
ALL INSPECTIONS WILL BE ON FRIDAY

FOREWORD

NEW LIMOUSIN HERD HEALTH RULES

This British Limousin Cattle Society Sale is being held under the progressive new herd health rules which were introduced by the BLCS at nominated premier Collective Society Sales from May 2011. All vendors are to be members of, and in adherence to, the terms of a CHeCS licenced Herd Health Scheme.

Commenting, BLCS Chairman Peter Kirton says: "Going down this very positive health route is another major long-term step forward for the Limousin breed. Purchasers, both pedigree and commercial, want to buy breeding stock with a known health status. It is very much an expectation that this new policy will build on that principle and will be widely welcomed."

The Society's new health policy at sales has two principal elements:

Part 1. From 1st May 2011, herds selling at the premier Collective Society Sales have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme. At a minimum, this must include a whole herd test for Johne's disease.

Part 2. From 1st May 2011, all animals male and female, including calves at foot, presented at the premier Collective Society Sales be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. All animals forward will be required to be BVD vaccinated prior to sale with an approved vaccine. Pregnant animals must have had testing and vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

The new Herd Health at Sales policy is now in place at all premier BLCS Collective Sales (Stirling February & October; Carlisle February, May, October & December; Brecon May & November).

Herd Health at British Limousin Cattle Society (BLCS) Collective Sales

Introduction

Following the cash-back Herd Health Initiative introduced by the Society in 2005, a second major health step saw the introduction of Herd Health Declarations at BLCS Collective Sales from 2007.

New herd health rules were introduced by the BLCS at nominated premier Collective Society Sales from May 2011 and these are now in place at all premier BLCS Collective Sales (Stirling February & October; Carlisle February, May, October & December; Brecon May & November).

The principal aim is to standardise herd health declarations and information presented in order to provide both members and customers alike with clear, accurate herd health information at the point of sale and within the given sale catalogue. As such it is attractive and informative for customers and aims to further raise the level of buyer confidence.

BLCS Herd Health Rules have two principal elements:

Part 1. From 1st May 2011, herds selling at the premier Collective Society Sales have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme. At a minimum, this must include a whole herd test for Johne's disease.

Part 2. From 1st May 2011, all animals male and female, including calves at foot, presented at the premier Collective Society Sales be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. All animals forward will be required to be BVD vaccinated prior to sale with an approved vaccine. Pregnant animals must have had testing and vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

Herd Health Declaration

The sale entry form is accompanied by a Herd Health Declaration form asking vendors questions regarding for example: TB status; membership of CHeCS (www.cheecs.co.uk) health schemes (Advance Cattle Health Scheme, AFBI Cattle Health Scheme, Herdsure Cattle Health Improvement Service, HiHealth Herdcare, NML Herdwise, Premium Cattle Health Scheme, Shetland Animal Health Scheme) and Johne's, BVD, IBR and Lepto status. This form is shown here.

A condensed version of the Herd Health Declaration information appears in the Vendors' Index at the front of the respective sale catalogue.

Is the Herd Health Declaration compulsory?

For premier collective sales (Carlisle February, May, October & December; Stirling February & October; Brecon May & November) the Herd Health Declaration is compulsory. For reasons of clarity and to provide purchasers with the most accurate information available, vendors are required to complete this at time of entry.

Although not compulsory at other collective sales (Ballymena, Dungannon, Thainstone & Stirling in May), the Society recommends that vendors complete the Herd Health Declaration. This information then appears in the Vendors' Index within the catalogue.

Where a member has chosen not to complete the Herd Health Declaration, it will simply say 'No Herd Health Declaration'.

What Other Health Information may be displayed?

Vendors are encouraged to apply to their respective CHeCS health scheme for individual animal health cards for display on pens. For an individual animal's test results, or vaccination histories, regarding BVD, IBR, Lepto or Johne's, these are permitted above the sale pens only upon presentation of a signed veterinary declaration to verify that the animal concerned has had a clear test.

Again, for reasons of practicality, no health information notes are to be put in the catalogue footnotes by vendors. Similarly, the Society has requested that no declarations on health information be given by the auctioneer during the sale. Again, the sole purpose of this is to avoid confusion and to try and ensure that the information provided is done accurately, fairly and in a standardised format in the catalogue. This point has been agreed with the auctioneers.

Introduction of Johne's Risk Levels from 1st January 2013

From 1st January 2013, CHeCS, the self-regulatory body for cattle health schemes in the UK and Ireland, has agreed a change to Johne's testing with herds classified on a Risk Level basis of 1 to 5 (with 1 being low risk and 5 high risk). **Please note that the new Risk Levels only apply to herds that have completed a whole herd test for Johne's under the new classification (which could be any time until 31st December 2013).** In due course, a new version of the Herd Health Declaration will include a section where breeders will be able to indicate their Johne's Risk Level, once known.

The Risk Levels are as follows:

Risk Level 1 herds that were previously Accredited

Risk Level 2 herds that have had 1 or more clear qualifying tests

Risk Level 3 herds that have 3% or fewer reactors every year*

Risk Level 4 herds that have more than 3% reactors every year**

Risk Level 5 herds not in a CHeCS Johne's disease programme and herds with no health plan in place

* Note, for herds with fewer than 33 animals in the target age range, rather than 3%, Risk Level 3 will be one animal testing positive for Johne's

** Note, for herds with fewer than 33 animals in the target age range, rather than 3%, Risk Level 4 will be more than one animal testing positive for Johne's

Should you have any queries regarding the new Johne's Risk Level classification, please contact your respective CHeCS health scheme.

What if a vendor is selling an animal/s that he did not breed?

Vendors are still requested to fill in the Herd Health Sale Declaration accordingly.

Prospective customers are advised to speak to vendors directly to acquire accurate health information on animals offered but not bred by the seller.

Feedback & more information

The Society welcomes members' and customers' feedback on the Herd Health Declarations and health policy at sales. If you have further questions, please speak to the Society representatives, Iain Kerr & Richard Saunders, or the Auctioneers.

PRIZE SCHEDULE & CLASSIFICATION:

JUDGE: Colin Phillips – Powerhouse Herd

The Show will commence at 9.30 a.m.

Rosettes will be awarded to 1st, 2nd, 3rd and 4th in each class.

BULL CLASSES AS LISTED IN THE CATALOGUE

FEMALE CLASSES WILL BE ALLOCATED ON THE DAY

PRIZEMONEY FOR BULL CLASSES

GENEROUSLY DONATED BY DALTON TAGS,

APPROVED SUPPLIER TO THE BRITISH LIMOUSIN CATTLE SOCIETY,

FOR CONTACT DETAILS PLEASE SEE ADVERT ON INSIDE FRONT COVER

PRE-SALE INSPECTION:

All Bulls entered for the sale will be inspected by a veterinary Surgeon who will inspect eyes, teeth and testicles. Any abnormalities found to be serious enough will result in the animal(s) being rejected and the necessity to remove such animals from the sale premises. Any other abnormalities such as warts will also be subject to full veterinary inspection. Also all Bulls will be subject to an inspection to include identity, temperament, locomotion and conformation by a Society appointed Inspector as per the Society's byelaws. Bulls will also be weighed and weights declared. Females will be sold under BCLS Breeders' Sale Rules and will be subject to an identity (tag) check only.

INSPECTIONS WILL COMMENCE

Friday, 8th NOVEMBER from 2.00 p.m.- 5.00 p.m.

ALL INSPECTIONS WILL BE ON FRIDAY

UPSET PRICE:

All bulls above 14 months of age will be subject to an upset price of 1,500gns.

All females above 12 months of age will be subject to an upset price of 800gns.

TAURUS AGRIDIRECT INSURANCE

INSURANCE

Due to the fact that a Veterinary Inspection has been carried out on bulls for the buyer's convenience, Taurus is pleased to offer purchasers fall-of-hammer insurance. Please speak to Taurus representative Richard Saunders (0784-3336213) either at today's sale, or by telephoning before midday on the first working day following the sale.

FALL-OF-HAMMER COVER AVAILABLE TO PURCHASERS

Bulls up to 4 years of age

All Risks of Mortality (as per Lloyd's livestock wording LMA 3093) & Bull Loss of Use (Accident, Sickness and Disease) as per Crowe Livestock wording 10b

Rates

All Risks of Mortality (as per LMA 3093) & Bull Loss of Use (Accident, Sickness & Disease) as per Crowe Livestock wording 10b	Value up to £10,000
3 months	7.00%
6 months	10.00%
12 months	12.00%

Subject to a compulsory 10% co-insurance (excess)

Cows & Heifers up to 7 years

All Risks of Mortality (as per LMA 3093). Please note, for females a vet certificate will be required. For a period of less than 6 months, cover will exclude all losses as a direct or indirect result of parturition (calving). Losses to cows as result of calving are included in the All Risks of Mortality rates for 6 or 12 months

Rates

All Risks of Mortality (as per LMA 3093):	Value up to £10,000
3 months (excludes death as a result of parturition)	2.70%
6 months (includes death as a result of parturition)	4.50%
12 months (includes death as a result of parturition)	6.00%

Calves

12 months' All Risks of Mortality (as per LMA 3093).

Rates: age 24 hours to 13 days 8.00%; age 14 days to 3 months 7.00%

*A minimum and retained premium of £150 will apply to all Policies
Please note that 6% Insurance Premium Tax is to be added to all Premiums*

Copies of policies will be forwarded to purchasers after the sale. **In the event of any queries, please telephone Taurus on 02476-696516 or speak to Richard Saunders (0784-3336213) at the Sale.** Please note, insurance cover may be requested up to midday on the first working day after the sale

Taurus is an Appointed Representative of Amlin Underwriting Services Ltd trading as Crowe Livestock. Authorised and regulated by the Financial Services Authority.

A User's Guide to Estimated Breeding Values

Contents

1. Estimated Breeding Values (EBVs)
2. How are EBVs Calculated?
3. Breeding Indexes
4. Accuracy
5. EBV Indexes
6. 200 Day Milk
7. How to Use EBVs and Indexes
8. Understanding Sale Cards and Catalogues
9. EBVs and Pedigrees Just a Click Away
10. Further Information

1. Estimated Breeding Values

Many factors influence the appearance and performance of a bull, so selecting 'by eye' alone can be misleading. The only accurate way of assessing the genetic potential of an animal (i.e. what it can pass on to its calves) is by using Estimated Breeding Values (EBV's) and Indexes. These are produced by Signet using a system known as BLUP (Best Linear Unbiased Predictor) and are calculated from animals' individual performance records as well as those of all their known relatives, where the effects of the environment (feeding, management, disease, climate etc) are sifted out to leave an estimate of the genetic value for each trait, as follows...

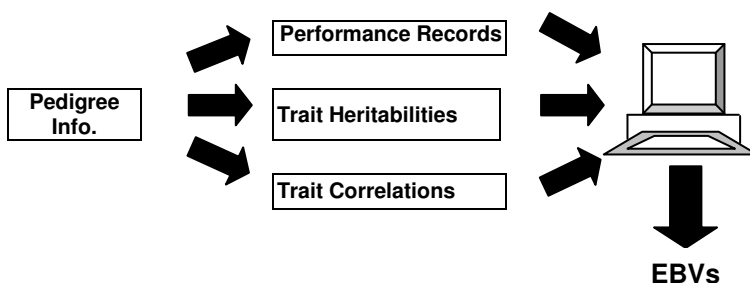

EBV	What Does the EBV Indicate?	Look for...
Birth Weight (kg)	Genetic potential for calf weight at birth	High negative EBVs if you want low calf birth weights
Calving Ease (%)	Ease with which a bull's progeny will be born	High positive EBVs if you want less assisted calvings
Maternal Calving Ease (%)	Ease with which a bull's daughters will calve	High positive EBVs if you want less assisted calvings
Gestation Length (days)	Genetic potential for gestation length	High negative EBVs if you want short gestation lengths
200 Day Milk (kg)	The maternal component of 200 day growth (i.e. the contribution that the milking and maternal abilities of a bull's daughters make towards their calves' growth at 200 days of age)	High positive EBVs if you want daughters to wean heavier calves
200 Day Weight (kg)	Genetic potential for growth from birth to 200 days of age	High positive EBVs if you want high growth rates to weaning
400 Day Weight (kg)	Genetic potential for growth from birth to 400 days of age	High positive EBVs if you want high growth rates to finishing
Muscle Depth (mm)	Genetic potential for muscularity and potential to increase lean meat yield	High positive EBVs if you want good calf conformation
Fat Depth (mm)	Genetic potential for leaner carcasses	High negative EBVs if you want to produce leaner carcasses or take calves to heavier weights without penalty for fatness
Age at 1st Calving (%)	Genetic potential for early sexual maturity	High negative EBVs for a greater proportion of heifers that hold to 1 st service
Longevity (years)	Genetic potential for long life in the breeding herd	High positive values for animals likely to remain in the herd for longer
Calving Interval (days)	Genetic potential for the time taken to get back in calf	High negative values to breed cows that get back in calf quickly
Docity (%)	Genetic potential for being calm when handled	High positive values for animals that are likely to be more calm when handled
Scrotal Circumference (cm)	Genetic potential for scrotal size. Linked to male serving capacity and puberty of daughters.	High positive values for animals with higher likely serving capacity and earlier maturing daughters.

2. HOW ARE EBVs CALCULATED?

EBVs are calculated using information from several sources:

- Measurements from the animal itself
- Measurements from the animal's herd mates (known as 'contemporaries' *)
- Measurements from the animal's relatives and their contemporaries
- The degree to which one trait influences another (known as a 'correlation' *)
- The degree to which each trait is passed on to the next generation (known as 'heritability' *)

* Terms explained below

Each EBV calculation involves solving a set of simultaneous equations where the 'unknowns' are the genetic value of the animal and the environmental effect on its performance. When carried out many times, using all the information on the animal above, the equations are able to quantify the unknown genetic component.

The end result is the EBV and over time, as more pedigree and performance data is added, the solution to the equations becomes more accurate as the *true* breeding value of the animal is approached.

Heritability and Correlations

Heritability

This is a term used to describe the strength with which traits are inherited and it varies depending on the trait in question. Generally:

- Traits associated with reproduction and survival have low heritabilities
- Milk production and early body size have medium heritabilities
- Later growth and carcass traits (i.e. fat and muscle) have relatively high heritabilities

Where traits with relatively good heritability are concerned, when something is known of the performance of one or both parents, then a prediction can be made as to how the offspring will perform and BLUP uses this 'knowledge' to enhance the accuracy of its EBV calculations.

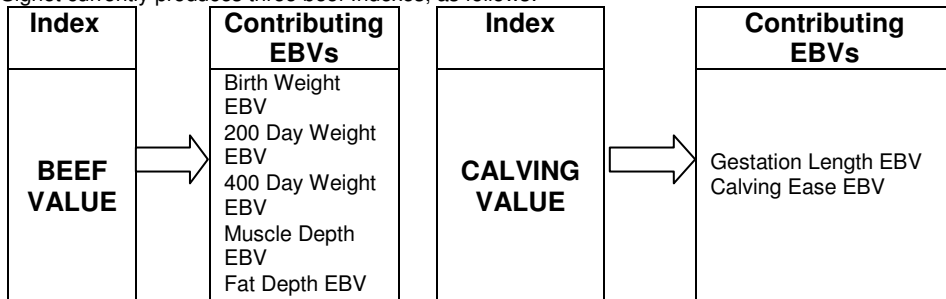

Correlations

This term describes the direction and strength of the association between two traits. For example, some traits are highly positively correlated, such as 200-Day Growth and 400-Day Growth, whilst others are highly negatively correlated, such as 400-Day Growth and Calving Ease. When something is known of one trait but perhaps not another, a prediction can be made based on what is known about the correlation between them. This again enhances the accuracy of the EBV in question and helps deal with situations where records for a trait are limited or unavailable.

3. BREEDING INDEXES

It is often desirable to select animals on the basis of more than one EBV. Indexes focus on specific breeding goals and combine the appropriate EBVs in to a single figure based on their relative economic value. This is widely regarded as the most efficient method of selecting on a number of traits at once.

Signet currently produces three beef Indexes, as follows:

* New EBVs not yet published at breed sales

When using an Index it is important that your breeding objective is broadly similar to that of the Index in question, otherwise you may unwittingly change aspects of your herd that you did not necessarily want to.

4. ACCURACY

An Accuracy Value is published next to every EBV and Index. Accuracy Values are expressed as a % and indicates the quantity and quality of records used to produce the EBV or Index.

Several things affect the accuracy of an EBV or Index, namely:

- The amount of information on the trait from the animal itself
- The amount of information on the trait from relatives of the animal
- The heritability of the trait concerned
- The amount of information from the animal and its relatives on traits correlated with the trait of interest and the strength of the correlations which vary between different traits.
- The number of herd mates from the same management group recorded ('contemporaries').

Scaling for Low Accuracy

An important feature of BLUP EBVs is that they are scaled to account for the amount of performance information on which they are based. EBVs based on very little information get adjusted towards the average EBV and this adjustment applies to both high and low EBVs.

This prevents animals gaining very high or very low EBVs as a result of a few very good or very poor records and is designed to protect the user from risk. The more information available on an animal and its relatives, the less the EBVs are adjusted.

Accuracy Values indicate how similar an animals' EBVs are to its true breeding value. They predict the likelihood that an animals EBVs will change over time

5. EBV INDEXES

To aid interpretation at breed sales, all Limousin EBVs are presented in index form based around an average of 100 with an approximate range of 70 to 130. For example:

	Calving Value	200 Day Milk (kg)	200 Day weight (kg)	400 Day weight (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
EBV	LM -4C	-1	+25	+34	+3.40	-0.20	LM +23
Accuracy %	85	54	75	73	68	66	73
Index	77	98	112	106	111	111	108

Below average

Above average

6. MATERNAL EBVs

Many commercial and pedigree producers are breeding their own female replacements and need to identify bulls with superior maternal attributes.

200 Day Milk EBV

One of the most important maternal EBVs is the 200 Day Milk EBV – indicating the degree to which 200 day milk is influences by maternal performance – e.g. milkiness and general mothering ability.

As well as predicting breeding potential for growth to 200 day of age, the 200 day weight can be used to assess an animals breeding potential for milking ability.

Consider the performance of the grand-offspring of a bull. The weights of all of his grandprogeny are influenced by his growth genes, but only those produced by his daughters are affected by his genes for milk.

If the grandprogeny produced by his daughters are constantly heavier than those produced by his sons, then this is likely to be due to his superior genes for milk production.

Interpretation

A bull with an EBV of +4 for 200-Day Milk is expected to produce heifer calves which will have above average maternal characteristics leading to their calves being 2kg heavier at 200-days than calves from heifers sired by a bull with an EBV of 0.

Maternal Calving Ease

This EBV predicts how easily a bull's daughters will calve. It should not be confused with the Calving Ease EBV which predicts how easily a bull's progeny will be born.

The Maternal Calving Ease EBV is calculated from calving records and is expressed as a % indicating the proportion of unassisted calvings.

Interpretation

A bull with a Maternal Calving Ease EBV of 2% will produce females that have 1% more unassisted calvings than a bull with an EBV of 0.

EBVs are also produced for: Longevity, Age at First Calving and Calving Interval but these are not yet published at breed sales.

7. How to Use EBVs and Indexes

EBVs are expressed in the same unit as the recorded trait (e.g. kg for 400-Day Weight, mm for Muscle Depth etc) and are relative to a Breed Benchmark, which is updated and published annually.

Limousin Breed Benchmark 2013

Trait	BOTTOM			AVERAGE	TOP		
	1%	10%	25%		25%	10%	1%
Gestation Length (days)	3.7	1.9	1.2	0.5	-0.2	-1.0	-2.6
Calving Ease (%)	-8.4	-4.7	-3.3	-2.3	-1.1	-0.3	1.0
Maternal Calving Ease	-1.0	-0.2	0.2	0.6	1.0	1.2	1.7
Birth Weight (kg)	3.4	2.4	1.9	1.3	0.9	0.4	-0.4
Calving Value	LM-4C	LM-2C	LM-1C	LM0C	LM1C	LM2C	LM4C
200-Day Milk (kg)	-6	-3	-2	-1	1	2	5
200-Day Weight (kg)	-4	6	12	17	25	32	45
400-Day Weight (kg)	-4	13	22	30	43	55	77
Muscle Depth (mm)	-0.7	0.6	1.2	2.1	3.1	4.1	6.0
Fat Depth (mm)	0.4	0.1	0.0	-0.1	-0.2	-0.3	-0.6
Beef Value	LM6	LM13	LM16	LM20	LM26	LM31	LM41
Maternal Value	LM-21V	LM-9V	LM-3V	LM4V	LM9V	LM16V	LM28V

When using EBVs it is important to remember that although they can be compared between herds, they can not be compared between breeds.

Using the Breed Benchmark, compare and contrast the EBVs and Indexes of the two young bulls below.

Bull A

Analysis Date	Calving Value	200 Day Milk (kg)	200 Growth (kg)	400 Growth (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value

MLC's Signet Breeding Services

- Each bull has been fully weight recorded (i.e. they both have a complete set of 100-day adjusted weights), scanned (the box says 'Yes') and possesses satisfactory accuracy figures, given their age.
- Both bulls have EBVs for growth and carcase traits that are above the breed average, but in several ways their characteristics differ:
 - >Bull A has a higher Muscle Depth EBV
 - >Bull B has the highest EBVs for growth rate (weight) EBVs
 - >Bull A has a 200-Day Milk EBV in the Top10% of the breed
 - >Bull B has a Calving Value in the Top 10% of the breed

Bull A would be the most suitable out of the two for a unit where conformation takes high priority. The high 200-Day Milk Weight EBV would also make it suitable for herds where female replacements are retained for breeding.

The high Calving Value of Bull B indicates that it would be more suitable for mating to heifers. It could also be used in herds where a priority is to improve growth.

Remember

When trying to establish just how much influence a bull will pass on to his progeny it is important to remember to halve the value of the EBV, since the other half of a calf's genes comes from the cow.

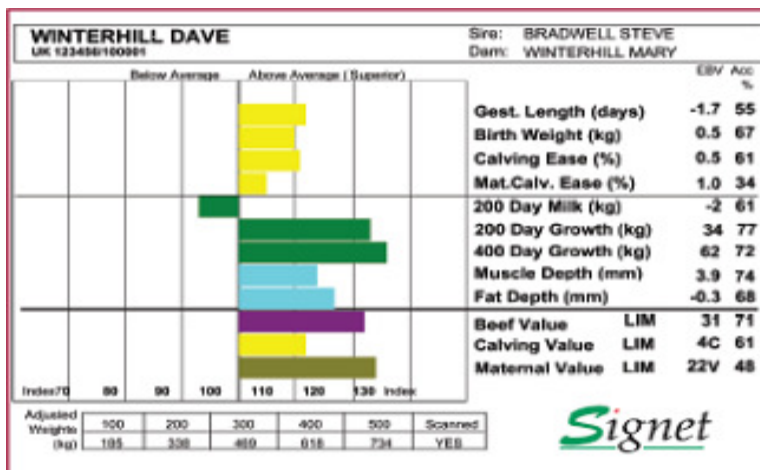

For example, a bull with a 400-Day Growth (weight) EBV of +62 is estimated to have the genetic potential to be 62kg heavier at 400 days of age compared to a bull with an EBV of 0.

Based on their sire's genetics, his calves would be expected to be 31kg heavier at that age when compared to calves by a bull with an EBV of 0, since they only inherit half of their growth genes from their sire (the other half coming from their dam).

8. UNDERSTANDING SALE CARDS AND CATALOGUES

Estimated Breeding Values on Sale Cards

EBVs and Indexes are produced on sale cards as shown below:

Bars that lie to the right of the central line indicate the EBV/Index is above breed average (and the further it is to the right, the higher above breed average it is). Similarly, bars to the left of the central line indicate the EBV/Index is below breed average (and the further to the left it is, the further below average it is).

In sale catalogues, the same figures are produced in table format similar to the examples of Bull A and Bull B above. The EBV Index (bottom line) will quickly indicate where values lie in relation to the breed average. The Breed Benchmark printed in the front pages of the catalogue will allow further refinement of this.

9. EBV and PEDIGREE INFORMATION JUST A CLICK AWAY

EBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Click the 'Basco Online Herd Book' button on the Limousin Society homepage (www.limousin.co.uk)

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its EBVs, its pedigree and list its progeny with full links to all of their information.

10. FURTHER INFORMATION

For further information, please contact Alison Glagsow at Signet on telephone 01721 730664, e-mail alison.glasgow@eblex.ahdb.org.uk or write to Signet, AHDB, Stoneleigh Park, Kenilworth, Warwickshire, CV8 2TL or visit the Signet web site www.signetfbc.co.uk

LIMOUSIN

Post-Purchase Management of Young Bulls

Prepared by Ian Pritchard, Beef Specialist, SAC

Purchase

Buy well in advance to allow time to settle – make it a planned rather than last minute decision. Recommendation is to buy at autumn sale for early spring use or February sale for later spring use or May sale for autumn use

On getting bull home, isolate bull for a month. Check his working capability and health and vaccinate/treat as necessary. A semen test should be carried out. Try and minimise stress

Remember a short working life increases cost

Insurance companies may refuse claims in cases of unsatisfactory management of a bull

Feeding

Young bulls are in forward condition at sale and should be allowed to lose condition gradually – they are still maturing. Dietary changes should not be sudden – try and find out the diet prior to purchase so that a stable rumen environment can be maintained. Forage alone will not be sufficient to maintain a young bull which may be anything up to 1,000kg in weight. They should be fed to gain at 0.8kg/day

Feed concentrates in at least 2 feeds for one month after purchase. Prior to purchase, a bull will have been fed on a high concentrate level fed frequently per day

A bull will have seen little grass since the suckling period. Ideally do not turn to grass without supplementary feed for at least 4-6 weeks after purchase

“Do not keep him on a slippery floor surface. Look after his feet by trying to keep him on a partial hard surface”

Housing

Bulls will have been in individual pens with a lot of human contact (walking/grooming) plus several feeds per day

Do not ignore him post-purchase by keeping him in a confined space or tied in a dark shed. Provide him with human contact and allow him to see his surroundings even though he is in isolation

Do not keep him on a slippery floor surface and certainly do not allow him to serve cows on this surface. Look after his feet by trying to keep him on a partial hard surface

Make sure pen divisions are high and strong – many accidents happen with bulls trying to jump out of pens shortly after arrival

Training

Young bulls are sexually inexperienced

Using prior to sale is resisted as they become harder to handle

Try and pen bulls where they can see cows/ other bulls working

Take a mature cow to him and allow him to serve her several times

Working

Avoid overwork – young bulls are enthusiastic but have low semen reserves

Target 20 cows in the first season

Try and get him to take a bit of supplementary feed to maintain body condition score around 3

Remove from cows if it is apparent condition is being lost – it will only lead to barren cows

Check he is serving correctly (20-40% of bulls could be infertile or sub-fertile) so keep a watchful eye and check herd 3 weeks later. If in doubt, pull him out. It is essential to PD cows after bull removed from herd

“Provide him with human contact and allow him to see his surroundings”

Annually (for all bulls)

Being fertile one season is no guarantee. Prior to the next season do bull “MOT” and fertility check in conjunction with vet

Do not trim feet just before use – plan for 6-8 weeks before. Feet and legs do a lot of work in mating season

Feed 2-3kg concentrates per day prior to mating season to build condition ready for an active season

Adapted from “Bull Selection Made Simple – A Guide for the Commercial Buyer” published 2011 by SAC & QMS

Vendors' Index & Herd Health Summary

November 2013

The Vendors' Index includes a condensed version of the Herd Health information submitted at point of entry by the vendor. For further information, please see Explanatory Notes & copy of Herd Health Declaration form also included in the catalogue.

Notes: Hector is a heifer's calf and is a powerful growth bull with plenty of width and muscle, he is sired by Cowin Elitor which was one of the heaviest bulls we've ever bred (nearly 800kg at 400days). He carries figures for Growth and Muscle which are in the top 10% of the breed and his CalvingEase is average for the breed. The Cowin herd won the SW & MW Limousin Club Overall Herd and Youngstock for 1012

Notes: Hugo is a big powerful bull with plenty of width and natural muscle, he weighed 760kg at 400 days and is in the top 1% of the breed for Growth and Muscle with an extreme overall figure of 47BV. He is sired by Astaluego which always produces progeny that grow well and are easy fleshing. The Cowin herd won the SW & MW Limousin Club Overall Herd and Youngstock for 2012

CONDITIONS OF SALE

1. The highest bidder shall be the purchaser and if any dispute shall arise between two or more bidders, the lot in dispute is to be put up again at the sum last bid or the Auctioneers may declare the purchaser.
2. The bidding is to be ruled by the auctioneers who may without giving any reason refuse to accept the bid of any person.
3. No person shall retract a bid without permission of the Auctioneers, who reserves theright to himself of refusing a bid, and also the right of withdrawing any lot or lots from the sale.
4. No bidder may advance less at a bid than the sum named from time to time by the Auctioneers.
5. The Purchaser must declare their name and address and if required to, pay the Auctioneers or his clerk the amount of purchase money immediately on the fall of the hammer. In default of which the lot or lots shall be offered again and re-sold, and under no circumstances must any lot be removed without first obtaining a pass from the clerk.
6. Title to each asset sold will only pass on payment in full by the Purchaser. Purchasers' attention is drawn to the Retention of Title clause 20.7 on the Conditions of Sale recommended for use in livestock auction markets by the Livestock Auctioneers Association as displayed in the sale office.
7. The Auctioneers reserve the right of deviating from the catalogue either byamalgamation or dividing the lots, as circumstances may require, and also by deviating from the order of sale.
8. The lots are to be under the immediate care of the Purchasers who must take thesame with all faults, imperfections and errors of description (if any) and remove thesame at their own expense and risk, and no purchaser shall be allowed to remove lotsfrom the premises until the whole of the purchase money is paid.
9. All statements contained in this catalogue as to the authenticity, genuineness, date, age, condition, or quality of any lot are statements of opinion and are not taken as to implying, statements or representations of fact.
10. Intending purchasers must satisfy themselves by inspection as to all such matters as to the physical description of any lot.
11. Neither the Vendor(s) of any lot nor the Auctioneers make or give any representation or warranty as to fitness for purpose or the quality of lots sold.
12. If any lots are described at the time of sale as in 'working order' such lots shall have no defect which renders them incapable of the reasonable work for which they are intended and they must be capable of performing such work.
13. The Purchaser is to make good any damage done to the premises by the removal or otherwise of any lot or lots.
14. The Purchaser shall not be entitled to any right of "Set Off" against the Vendor or the Auctioneer.

15. In the case of lots upon which this is a reserve, the Auctioneers shall have the right to bid on behalf of the seller.
16. Upon failure to comply with the above conditions, the uncleared lots will be re-sold either or by public or private sale and the deficiency (if any) and all expenses attendant thereon, shall be made good by the defaulters at this auction, who shall have no claim for any surplus that may arise.
17. The Auctioneers may rescind any sale within 3 hours of the final lot being sold if the lot has been sold under reserve. In the event of such rescission the purchase price or any part already paid by the Buyer shall be repaid but the parties and the Auctioneers shall be under no further liability to each other.
18. **LIVESTOCK.** ALL LIVESTOCK ARE SOLD WITH THE WARRANTIES AND RESPONSIBILITIES AS LISTED IN THE CONDITIONS OF SALE FOR CATTLE, CALVES, SHEEP AND PIGS AT LIVESTOCK AUCTION MARKETS RECOMMENDED FOR USE BY THE LIVESTOCK AUCTIONEERS ASSOCIATION WHICH ARE DISPLAYED IN THE AUCTIONEER'S OFFICE AT THIS SALE UNLESS SPECIFIC BREED SOCIETY OR NBA CONDITIONS APPLY IN WHICH CASE THEY TAKE PRIORITY.

19. COMPLIANCE WITH ROAD TRAFFIC ACTS

The Purchaser of any vehicle or trailer is responsible for complying with all legal requirements as to the construction and the use of such vehicle or trailer and for obtaining all certificates, permits or other authorisations necessary before such vehicle or trailer can be used on the road.

20. HEALTH AND SAFETY AT WORK ACT 1974 AND ALL OTHER ACTS AND REGULATIONS APPLICABLE TO FARM SAFETY

The Purchaser of any lots is responsible for complying with all legal requirements as the safe use of lots purchased at the sale and shall ensure compliance with all relevant legislation relating to the safe use of such lots.

21. TRADE DESCRIPTIONS ACT 1968

The Vendor is reminded that under the terms of the Traders Description Act 1968 the Vendor of any lots to which a false description is applied may be guilty of a criminal offence punishable by fine or imprisonment.

MEMBER'S ACCOUNTS REGULATIONS 1993 NOTICE REQUIRED UNDER REGULATION 2A

This sale is not required to comply with the requirements of the Member's Accounts Regulations of the Royal Institution of Chartered Surveyors. No monies paid are covered by any scheme for protection of clients' monies operated by the Royal Institution of Chartered Surveyors. This notice is published in accordance with the requirements of the Royal Institution of Chartered Surveyors from whom a more detailed explanation can be obtained by writing to:
