Better Breeding

For two decades, our animal DNA tests have enhanced selection, breeding and marketing decisions. Today, Neogen is a world leader in genomic solutions and services.

Our customers can choose solutions from our extensive testing portfolio to make profitable choices about their future herds. Our many services include:

- Igenity® Beef and Angus Gold Profiles
- DNA screening for parentage, commercial traits, genetic recessives and causative mutations
- Genotyping to determine genetic merit & genomic breeding values

Contact us today for more information on our genomic solutions.

Johne's Disease Risk Level Reminder - CHACS

If you are looking to buy or sell stock it is important to know your own herd's Johne's disease risk level, as well as that of any cattle that you might add to your herd.

- Level 1** – There have been at least three clear annual herd tests and there is a Johne's Disease herd health plan in place. This is the lowest level of risk
- Level 2** – There has been at least one clear herd test but the herd does not yet qualify for Level 1 status. There is a Johne's disease herd health plan in place
- Level 3** – Three per cent or less of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place
- Level 4** – More than three per cent of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place
- Level 5** – This includes herds without a health plan for Johne's disease, herds that not adhere to the mandatory elements of the health plan and herds that do not carry out the required testing. This is the highest level of risk

**PLEASE NOTE: IMPORTANT RULE ABOUT
BUYING AND SELLING AND RISK STATUS!**

It is important to remember that if an animal of a lower risk level status is added to your herd, if it is ever sold on from your holding it must be sold as its original risk level status (i.e. a Risk Level 3 animal added to a Risk Level 2 herd must remain as Risk Level 3 if sold again).

However, animals added from a higher Risk Level Status herd to a lower Risk Level Status herd take on the status of the herd that they are added to and must be sold as such (i.e. a Risk Level 1 animal added to a Risk Level 4 herd would then have to be sold as Risk Level 4 in the future).

Limousin bull index

The pedigree, performance, DNA, health information and footnotes included in Society sale catalogues is as supplied by, or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Limousin Cattle Society Ltd (BLCS). It should be noted that the Estimated Breeding Values for all animals change over time, as new performance records come available. While the BLCS seeks to ensure that the information contained in catalogues is accurate at the time of printing, no warranty is given in respect thereof and, to the maximum extent permitted by law, the BLCS shall have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained in or omitted from this publication.

Grace is one of the top females in the herd. Her last bull, Ronick Mckinley, was top price in October 2017 at 11000gns. This son proves to be every bit as good with good figures to back him up.

Newkidontheblock is the first calf from Joeuse who is from one of the best female lines of the Champeval herd in France and is half sister to Fenomen. Fenrir (sire) is a new sersia AI sire. Newkidontheblock has shown tremendous natural growth and power, has an extremely good temperament, carries 2 copies of the F94L gene and would be ideal to breed quality replacement females.

QR Codes

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

Notes

Improve **growth rates** in your beef cattle...

ActiSaf live yeast is added to our Brigadier and Taurus Beef Nuts, our Cattle Concentrate 34 Pellets and our custom blends. It is also available as a Farm Pack.

ActiSaf helps:

- Increase growth rates by up to 9%
- Stabilise rumen pH
- Improve feed intake
- Improve feed conversion efficiency
- Improve conformation and give faster finishing

ActiSaf^{Sc 47}
