Better Breeding

A close-up, slightly out-of-focus photograph of a cow's head, showing its eye, ear, and part of its snout. The cow has dark fur with some lighter patches. The background is a soft, out-of-focus green, suggesting an outdoor setting.

For two decades, our animal DNA tests have enhanced selection, breeding and marketing decisions. Today, Neogen is a world leader in genomic solutions and services.

Our customers can choose solutions from our extensive testing portfolio to make profitable choices about their future herds. Our many services include:

- Igenity® Beef and Angus Gold Profiles
- DNA screening for parentage, commercial traits, genetic recessives and causative mutations
- Genotyping to determine genetic merit & genomic breeding values

Contact us today for more information on our genomic solutions.

Johne's Disease Risk Level Reminder - CHACS

If you are looking to buy or sell stock it is important to know your own herd's Johne's disease risk level, as well as that of any cattle that you might add to your herd.

Level 1 – There have been at least three clear annual herd tests and there is a Johne's Disease herd health plan in place. This is the lowest level of risk

Level 2 – There has been at least one clear herd test but the herd does not yet qualify for Level 1 status. There is a Johne's disease herd health plan in place

Level 3 – Three per cent or less of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 4 – More than three per cent of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 5 – This includes herds without a health plan for Johne's disease, herds that not adhere to the mandatory elements of the health plan and herds that do not carry out the required testing. This is the highest level of risk

PLEASE NOTE: IMPORTANT RULE ABOUT BUYING AND SELLING AND RISK STATUS!

It is important to remember that if an animal of a lower risk level status is added to your herd, if it is ever sold on from your holding it must be sold as its original risk level status (i.e. a Risk Level 3 animal added to a Risk Level 2 herd must remain as Risk Level 3 if sold again).

However, animals added from a higher Risk Level Status herd to a lower Risk Level Status herd take on the status of the herd that they are added to and must be sold as such (i.e. a Risk Level 1 animal added to a Risk Level 4 herd would then have to be sold as Risk Level 4 in the future).

Keep Children Safe at United Auctions

Every year children are killed during agricultural work activities.

People often believe that farm children understand farm risks, but most children who are injured in agricultural incidents are family members. A few straightforward steps, and proper supervision of children, will reduce these risks.

Auction Marts like farms are not playgrounds, Children though are naturally curious, and will often get into apparently inaccessible places.

Remember that although parents have a particular responsibility to prevent their children straying or trespassing into areas where they may be at risk, all adults working in agriculture – employers, employees, contractors or other visiting workers – **MUST** take responsibility for the safety of children and young people.

To Reduce Risks, we Should

- ◇ Prevent children and young people from playing in or around livestock areas. Animals do not need to attack to pose a danger to people
- ◇ Provide adult supervision when children come into contact with livestock
- ◇ Make sure everyone working in the livestock areas is aware that children may be present.
- ◇ Explain that you are authorised to stop work if any children are in the work area and to send them somewhere safe.
- ◇ Not allow children out of a vehicle until vehicle is in a safe area and the children can be supervised. Prohibit children from walking across the loading/unloading area and do not enter or allow children to enter the crush zone when reversing vehicle up to loading/unloading ramp. Customers must ensure they supervise their children at all times in loading/unloading area.

If in any doubt you should ensure children

- Cannot enter any yard, pen or area occupied by potentially dangerous animals or vehicles

NO SMOKING

It is an offence to smoke in these premises. This includes the Sale Rings, Exhibition/Show Hall, Concourse and all Pennage Areas.

**Anyone smoking will be asked to extinguish their smoking material immediately or leave.
Your help in maintaining a smoke free environment for the benefit of all is appreciated.**

Accredited free from BVD since 2014, herd testing for BVD, routinely vaccinating against BVD

Compulsory BVD Vaccination Dates for Sale Animals Males 10/03/19 and 10/04/19

Johnes Status Risk Level 1 since 2018

McLAREN, JC & PARTNERS (DARGILL)**90****Knox House, Coldwells Road, Crieff, PH7 4BB**

Herd last tested clear from TB in 2018, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD since 2010, herd testing for BVD since 2009, routinely vaccinating against BVD

Compulsory BVD Vaccination Dates for Sale Animals Males 05/12/18 and 05/01/19

Herd testing for IBR since 2014, routinely vaccinating against IBR (Females Only)

Using Bovilis IBR-Marker Activated, Bovilis IBR Marker Activated

Herd testing for Lepto since 2009 (Females Only), routinely vaccinating against Lepto, Spirovac

Herd testing for Johnes, Johnes Status Risk Level 1 since 2013

McNEE, ROBERT & HAZEL (FINLARG)**85****Over Finlarg Farm, Tealing, Dundee, DD4 0QE**

Herd last tested clear from TB in 2017, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD since 2013, herd testing for BVD, routinely vaccinating against BVD

Compulsory BVD Vaccination Dates for Sale Animals Males 01/03/19 and 28/03/19

Johne's Status Risk Level 3

SMITH, GW (DRUMSLEED)**65, 70, 89****Drumsleed, Fordoun, Laurencekirk, AB30 1SL**

Herd last tested clear from TB in 2015, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD since 2010, herd testing for BVD since 2005, routinely vaccinating against BVD

Using Bovilis BVD, compulsory BVD Vaccination Dates for Sale Animals Males 12/12/18 and 09/01/19

Routinely vaccinating against IBR since 2008 (Females Only), using Rispoval IBR-Marker Inactivated

Breeding Females Only

Accredited free from Lepto since 2016, herd testing for Lepto since 2013

Herd testing for Johnes since 2006, Johnes Status Risk Level 1 since 2016

SMITH, S & K (FORGERON)**68, 71****Bankhead Farm, Duffhill Road, Portlethen, AB12 4RX**

Herd last tested clear from TB in 2018, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD since 2013, herd testing for BVD, routinely vaccinating against BVD (Males Only)

Compulsory BVD Vaccination Dates for Sale Animals Males 15/03/19 and 05/04/19

Herd testing for Johnes, Johnes Status Risk Level 3

STRONACH, WS (ISLAVALE)**76, 79, 80, 82, 83, 86, 88****Berryleys Farm, Grange, Keith, AB55 6LN**

Herd last tested clear from TB in 2018, currently on a 4 year TB testing interval

Member of HI Health

Accredited free from BVD since 2008, herd testing for BVD since 2007, routinely vaccinating against BVD

Using Bovela, compulsory BVD Vaccination Dates for Sale Animals Males 12/03/19

Herd testing for IBR since 2014, routinely vaccinating against IBR since 2015 (Females Only)

Using Rispoval IBR-Marker Inactivated

Herd testing for Johnes, Johnes Status Risk Level 1 since 2008

WEATHERUP, RS & ME (ROMA)**53****Romavale, Ashybank, Denholm, Hawick, TD9 8SZ**

Herd last tested clear from TB in 2018, currently on a 4 year TB testing interval

Member of HI Health

Herd testing for BVD since 2010, routinely vaccinating against BVD

Compulsory BVD Vaccination Dates for Sale Animals Males 17/07/18

Herd testing for IBR since 2017

Herd testing for Johnes since 2010, Johnes Status Risk Level 1 since 2012

WILSON, AJ (CAIRNVIEW)

91

Westcroft Farm, Lylestone Road, Kilwinning, KA13 7QN

Currently TB Exempt

Member of SAC Premium Cattle Health Scheme

Herd testing for BVD, compulsory BVD Vaccination Dates for Sale Animals Males 19/02/19 and 19/03/19

Herd testing for IBR, routinely vaccinating against IBR since 2017, using Rispoval IBR-Marker Activated

Limousin bulls

The pedigree, performance, DNA, health information and footnotes included in Society sale catalogues is as supplied by, or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Limousin Cattle Society Ltd (BLCS). It should be noted that the Estimated Breeding Values for all animals change over time, as new performance records come available. While the BLCS and Genesure Ltd seek to ensure that the information contained in catalogues is accurate at the time of printing in accordance with their terms and conditions, no warranty is given in respect thereof by the BLCS and, to the maximum extent permitted by law, the BLCS shall have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained in or omitted from this publication. Genesure Ltd's liability is limited to the extent set out in its terms and conditions (a copy is available from the BLCS office upon request).

Member of Biobest Hi Health Scheme

BVD accredited since 2010, vaccinated sale animals

IBR herd surveillance testing, IBR vaccinated sale animals

Lepto herd surveillance testing

Johnes risk level 1, consecutive 7 years

Selling on animals that have been purchased from another herd: When an animal is purchased from a herd with an inferior Johnes' disease risk level than the herd to which it is added, the purchased animals retains the risk level of the herd of origin should it be sold on. For example it cannot be sold as risk level 1 if purchased as risk level 2, 3, 4 or 5. Animals that are purchased from a herd with a superior risk level can be sold only at the risk level that applies to the purchasers herd at the time of the subsequent sale. For example, an animal purchased as risk level 1 into a risk level 4 herd can only be sold at the risk level that applies to the level 4 receiving herd at the time of subsequent sale. Source: CHecs Technical Document

Beef Shorthorn bulls

BROOKE ESTATE, GR (GORDON)

196, 197

Upper Huntlywood Farm, Earlstoun, TD4 6BB

Herd last tested clear from TB in 2018, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD, herd testing for BVD, routinely vaccinating against BVD

Routinely vaccinating against IBR

Johnes Risk Status Level 2

BROWN, KWW (CRAIGOWMILL)

TILLYFOUR FARMS PARTNERSHIP (TILLYFOUR) Wardes, Kintore, AB51 0YE	209
Herd last tested clear from TB in 2014, currently TB Exempt Member of SAC Premium Cattle Health Scheme Accredited free from BVD, herd testing for BVD, routinely vaccinating against BVD Routinely vaccinating against Lepto Johnes Risk Status Level 3	

WALKER, DAVID (GALCANTRAY)**207, 213, 225, 238****Galcantray Farm, Cawdor, Nairn, IV12 5XS**

Herd last tested clear from TB in 2015, currently on a 4 year TB testing interval

Member of SAC Premium Cattle Health Scheme

Accredited free from BVD, routinely vaccinating against BVD

Johnes Risk Status Level 2

WATTIE, NEIL A (TONLEY)**206, 215, 218, 233, 237, 246****Mains of Tonley, Alford, AB33 8EL**

Herd last tested clear from TB in 2015, currently on a 4 year TB testing interval

Member of Biobest Herdcare

Herd testing for BVD, routinely vaccinating against BVD

Herd testing for IBR

Herd testing for Lepto

Johnes Risk Status Level 1

WILLOX, WENDY (STRATHINVER)**210, 245****Broadmyre, Clatt, Huntly, AB54 4PQ**

Currently TB Exempt

Member of Biobest Herdcare

Accredited free from BVD, herd testing for BVD

Johnes Risk Status Level 1

Aberdeen-Angus heifer

BROWN, KWW & MRS EM (CRAIGOWMILL)**251****Craigowmill Farm, Milnathort, Kinross, KY13 0RR**

Herd last tested clear from TB in 2016. currently on a 4 year TB testing interval

Member of Biobest Herdcare

Herd testing for BVD

Herd testing for IBR

Herd testing for Lepto

Johnes Risk Status Level 2

Disclaimer: The health information above is supplied by or on behalf of the breeder. The health status of individual animals may differ from the herd declaration. For the most up to date health status check the pen card above the animal. The responsibility for the accuracy of the information rests solely with the breeder and not The Aberdeen-Angus Cattle Society.

Sale at 10.30 am

Charolais bulls

The British Charolais Cattle Society has a minimum selling price of
2000gns.

All animals are sold subject to a presale inspection to provide a minimum standard,
and animals are sold with all patent defects, and any subsequent claim
after the fall of the hammer is against the vendor and not
The British Charolais Cattle Society Ltd.

Champion & reserve champion will be sold after class 2

For sale only

Simmental bulls

The British Simmental Cattle Society has a minimum selling price of
2200gns

All animals are sold subject to a presale inspection to provide a minimum standard,
and animals are sold with all patent defects, and any subsequent claim
after the fall of the hammer is against the vendor and not
The British Simmental Cattle Society Ltd.

Champion & reserve champion will be sold after class 6

For sale only

QR Codes

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new popup menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.

British Charolais Myostatin Guide

What is Myostatin?

Myostatin is a gene that influences the production of proteins which control muscle development. When an animal is identified as having one of the mutations it means that they have inactive genes which do not control muscle growth as effectively, this can result in increased muscle mass. Currently in cattle, there are 19 known mutations of the gene and after extensive testing for the nine most common variants, we have concluded that the British Charolais cattle population only contains two - F94L & Q204X.

Why are we testing for Myostatin?

Knowing the myostatin status of your animals will help you to select bulls with the most appropriate myostatin traits for your breeding programme. This will lead to better calving ease and help with the ever-present trend to improve carcass conformation and quality. However, it is just one tool which should be used in conjunction with the wider information available such as Estimated Breeding Values (EBV's) – which predict the performance of the animal based on its back pedigree, accurate measurements and the performance of its herd mates – and your own judgement on type and pedigree.

How are these genes inherited?

All reproducing species have two copies of each gene – called alleles. If your Charolais has one copy of the myostatin variant (one allele) it is classed as **heterozygous**, if it has two copies (two allele) it is classed as **homozygous**.

The table to below shows the chances of inheriting depending on the status of the parents:

2 Homozygous Parents	→	100% chance of Homozygous offspring
1 Homozygous Parent 1 Heterozygous Parent	→	50% chance of Homozygous offspring 50% chance of Heterozygous offspring
1 Homozygous Parent 1 Non-carrier Parent	→	100% chance of Heterozygous offspring
2 Heterozygous Parents	→	25% chance of Homozygous offspring 50% chance of Heterozygous offspring 25% chance of non-carrying offspring
1 Heterozygous Parent 1 Non-carrier Parent	→	50% chance of Heterozygous offspring 50% chance of non-carrying offspring
2 Non-carrier Parents	→	100% chance of non-carrying offspring

Below is a quick guide to the traits that are likely to be evident in homozygous and heterozygous calves born compared to calves with no myostatin:

	Increased Beef Yield %	Increased High Value Meat Area	Reduced Carcase Fat	Reduced Subcutaneous Fat Depth	Reduced Intramuscular Fat Depth	Increased Meat Tenderness	Increased Muscle Mass	Reduced Fertility in Females	Reduced Calf Viability	Reduced Calving Ease	Increased Birth Weight	Reduced Stress Tolerance
1 x F94L (Heterozygous)												
2 x F94L (Homozygous)												
1 x Q204X (Heterozygous)												
2 x Q204X (Homozygous)												
Key	    Less ← → More											

Do you know what genes your cows are carrying?
Don't forget that the bull is only half the story.

MYOSTATIN CARRIER STATUS

All bulls entered at official Society sales have their Myostatin status displayed in the catalogue. The Myostatin nt821 gene is responsible for double muscling.

Myostatin Status No Carrier, means the bull does not carry the Myostatin nt821 gene.
Myostatin Status Single Version Carrier means the bull carries a single version of the Myostatin nt821 gene, but still accepted for registration by the Aberdeen-Angus Cattle Society

Improve **growth rates** in your beef cattle...

ActiSaf live yeast is added to our Brigadier and Taurus Beef Nuts, our Cattle Concentrate 34 Pellets and our custom blends. It is also available as a Farm Pack.

ActiSaf helps:

- Increase growth rates by up to 9%
- Stabilise rumen pH
- Improve feed intake
- Improve feed conversion efficiency
- Improve conformation and give faster finishing

ActiSaf^{Sc 47}
