Better Breeding

A close-up, slightly blurred photograph of a cow's head, showing its eye, ear, and part of its snout. The cow has dark fur with some lighter patches. The background is a soft, out-of-focus green, suggesting an outdoor setting.

For two decades, our animal DNA tests have enhanced selection, breeding and marketing decisions. Today, Neogen is a world leader in genomic solutions and services.

Our customers can choose solutions from our extensive testing portfolio to make profitable choices about their future herds. Our many services include:

- Igenity® Beef
- DNA screening for parentage, commercial traits, genetic recessives and causative mutations
- Genotyping to determine genetic merit & genomic breeding values

Contact us today for more information on our genomic solutions.

Keep Children Safe at United Auctions

Every year children are killed during agricultural work activities.

People often believe that farm children understand farm risks, but most children who are injured in agricultural incidents are family members. A few straightforward steps, and proper supervision of children, will reduce these risks.

Auction Marts like farms are not playgrounds, Children though are naturally curious, and will often get into apparently inaccessible places.

Remember that although parents have a particular responsibility to prevent their children straying or trespassing into areas where they may be at risk, all adults working in agriculture – employers, employees, contractors or other visiting workers – **MUST** take responsibility for the safety of children and young people.

To Reduce Risks, we Should

- ◇ Prevent children and young people from playing in or around livestock areas. Animals do not need to attack to pose a danger to people
- ◇ Provide adult supervision when children come into contact with livestock
- ◇ Make sure everyone working in the livestock areas is aware that children may be present.
- ◇ Explain that you are authorised to stop work if any children are in the work area and to send them somewhere safe.
- ◇ Not allow children out of a vehicle until vehicle is in a safe area and the children can be supervised. Prohibit children from walking across the loading/unloading area and do not enter or allow children to enter the crush zone when reversing vehicle up to loading/unloading ramp. Customers must ensure they supervise their children at all times in loading/unloading area.

If in any doubt you should ensure children

- Cannot enter any yard, pen or area occupied by potentially dangerous animals or vehicles

NO SMOKING

It is an offence to smoke in these premises. This includes the Sale Rings, Exhibition/Show Hall, Concourse and all Pennage Areas.

**Anyone smoking will be asked to extinguish their smoking material immediately or leave.
Your help in maintaining a smoke free environment for the benefit of all is appreciated.**

along with NBA fertility warranties**

For terms and conditions of sale and further information,
please see www.limousin.co.uk

Limousin index

The pedigree, performance, DNA, health information and footnotes included in Society sale catalogues is as supplied by, or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Limousin Cattle Society Ltd (BLCS). It should be noted that the Estimated Breeding Values for all animals change over time, as new performance records come available. While the BLCS and Genesure Ltd seek to ensure that the information contained in catalogues is accurate at the time of printing in accordance with their terms and conditions, no warranty is given in respect thereof by the BLCS and, to the maximum extent permitted by law, the BLCS shall have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained in or omitted from this publication. Genesure Ltd's liability is limited to the extent set out in its terms and conditions (a copy is available from the BLCS office upon request).

1. Birth Type

'Got by AI' indicates whether the calf was a result of an AI service. If blank, the dam was naturally served. 'Natural calf' indicates the calf was born to its biological dam. 'ET calf' indicates the calf was born as a result of embryo transplant.

2. Myostatin

"Not tested" indicates that no Myostatin test is currently available for the animal. Full details on the Myostatin variants and their effects on performance can be found on the Limousin Society website www.limousin.co.uk, search in 'performance programmes'.

In summary:

The Variants:

F94L	Animals with two copies of this gene (ie F94L/F94L) exhibit an increase in muscling (by up to 19%) with no associated increased in calving difficulty, lowered fertility or longevity and by far the majority of animals in the breed carry this gene. Heterozygous animals (those with one copy of the gene) also exhibit these characteristics but not to the same degree.
NT821	Animals with two copies of the gene (ie nt821/nt821) will exhibit characteristics of larger loin depths, reduced fat depths and large, rounded rump and thighs. However, unlike F94L, animals with two copies may also have slightly heavier birth weights bringing with it the potential for more difficult calvings. If animals are 'heterozygous' with F94L (ie F94L/nt821) they will still exhibit quality carcass characteristics but are less likely to be affected by more difficult calvings.
Q204X	Animals with two copies of the gene (ie Q204X/Q204X) will exhibit characteristics of larger loin depth, reduced fat cover and greater meat tenderness. However, they may also have the potential to exhibit larger birth weight and, if females, slightly reduced milking ability. Animals that are 'heterozygous' with F94L (ie F94L/Q204X) will still exhibit quality carcass characteristics but are less likely to be affected by larger birth weights and reduced milking ability.

Two further variants of Myostatin exist in the population but are relatively uncommon in their occurrence. Known as nt419 and E291X, their effects are similar to nt821 and Q204X respectively.

The recognised benefits of Myostatin

- ü **Increased Meat Yield** – by up to 19%.
- ü **More feed efficient**
- ü **Higher meat quality** – increased tenderness, reduced fat content, higher polyunsaturated fats

Using Myostatin information

An important factor to remember is that carcase traits (muscling, fat cover etc), calving traits and milk traits in cattle are controlled by MANY genes. Myostatin is only one of them and, as such, it is not an absolute predictor of an animal's performance.

A Myostatin genotype is a further bit of information that may help your decision, but it should be used in conjunction with wider information such as Estimated Breeding Values (EBVs), which bring together information of actual performance from the animal itself, its herdmates and its relatives to predict genetic merit, and your own judgment on type and pedigree.

3. Genetic Colour

Colour and polled/horned genes typically come in pairs called alleles. One is inherited from the sire and one from the dam. Where an animal's alleles are the same, it is said to be 'Homozygous' (Hom.) Where the alleles are different (because there is more than one variant of the gene), the animal is said to be 'Heterozygous' (Het.)

"Hom. Red" – animals will be red and will pass on red genes.

"Hom. Black" – animals will be black and will pass on black genes. All calves will be black, since black colour genes are dominant.

"Het. Black" – animals will be black and will pass on either a red or black gene.

"Het. Red" – animals will be red and will pass on a red gene or a colour gene known as the 'wild type' that is non-colour determinate. (The coat colour of calves inheriting the wild type gene will be governed by the gene they inherit from the other parent. It is rare, but it is also possible for an animal to be homozygous for the wild type gene, in which case they will be reddish/brown to brownish/black).

4. Genetics for Horned/Polled Status

A bull that is "Hom. Polled" - will be polled himself and all calves will be polled (since he only has polled genes to pass on and they are dominant).

A bull that is "Het. Polled" – will be polled himself and will produce some polled and some horned calves (assuming the cows are all horned).

A bull that is "Hom. Horned" – will be horned himself and will pass only horned genes to his calves.

For more information on both Genetic Colour and Polled/Horned, go to www.limousin.co.uk, search in 'performance programmes' or scan the QR code above.

5. Estimated Breeding Values and Genomic Estimated Breeding Values (EBVs & GEBVs)

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average.

- a. In sale catalogues, Breed Average for each trait is represented by the vertical line that is central on the bar chart...
 - ✓ Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are.
 - ✓ Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are.
- b. Accuracy Values (Acc%) are expressed as a % and indicate the quantity and quality of records used to produce each EBV, GEBV or Index. The closer they are to 100%, the more accurate the EBV. Highly accurate values are less likely to change over time.
- c. The numeric EBV & GEBV values on the charts can be used to further refine comparison with the breed using the Breed Benchmark which is updated annually.

For more information on EBVs and GEBVs, go to www.limousin.co.uk and search under 'Breed Improvement' in the main menu or scan the QR code opposite.

EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Go to www.taurusdata.co.uk

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

6. Adjusted Weights

These are the 'raw' weights recorded for the animal throughout its early growing stages. They are adjusted for age, but are not adjusted for any other factor such as management, nutrition, dam age, differences between farms etc.

LIMOUSIN

For further information or if you have any query, please let us know -
telephone 02476 696500, e-mail info@limousin.co.uk or speak to
Society staff and Council members attending the sale.

2020 Limousin Breed Benchmark

Trait	Bottom			Breed Average	Top		
	1%	10%	25%		25%	10%	1%
Gest. Length (days)	3	2	1	0	-1	-2	-3

For Enquiries: The British Limousin Cattle Society Tel 02476 696500 Email info@limousin.co.uk

* Where animals have been genotyped, the breeding values for these traits will be Genomic Breeding Values (GEBVs). Publication of GEBVs is at animal owners' discretion. If an animal has not been genotyped, the breeding value will be a conventional Estimated Breeding Value (EBV). Whether a breeding value is an EBV or a GEBV is noted alongside each value.

Please note that EBVs and GEBVs are interchangeable for the same trait. For example, an animal with a Calving Interval GEBV can be directly compared to an animal with a Calving Interval EBV. A link to further information on all EBVs and GEBVs is below.

FOR INFORMATION

Breeding Indexes

EBVs can be combined in to selection indexes to meet wider breeding objectives...

Calving Value	An economic indicator of the collective value of Gestation Length and Calving Ease
Beef Value	An economic indicator of the collective value of Birth Weight, Calving Ease, 400-Day Growth, Muscle Depth and Backfat Depth
Retail Value	An economic indicator of the collective value of Fillet, Striploin, Rump, Topside, Silverside and Knuckle at 600 days of age and a standard carcase weight of 350kgs.

NB: Using Calving Ease and Maternal Calving Ease

Calving Ease EBV *Predicts how easy a bull's own calves will be born.*

Maternal Calving Ease EBV *Predicts how easily a bull's daughters will calve.*

To search the Limousin database by Breeder, by EBVs/GEBVs and/or by Individual Animal go to www.taurusdata.co.uk and click on 'Beef Search'

For more information on EBVs and GEBVs please go to www.limousin.co.uk and click on 'Performance Programmes' or get in touch on the numbers below.

				Champion	Reserve
Senior Champion (Classes 1 - 3)					
Intermediate Champion (Classes 4 - 6)					
Junior Champion (Classes 7 - 9)					
Overall Male Champion					

The MacMin Perpetual Trophy
awarded to the champion Limousin bull

Victoria Square

Guest House

Only 3 miles to Stirling Bull Sales.

Offering 5 star luxury B&B accommodation in 7 stylish en-suite bedrooms. Located in the heart of Stirling, minutes from the M9 and easy walking distance from Stirling's city centre, golf club & attractions, as well as numerous restaurants and pubs.

- 32" Smart TVs & free WiFi
- Spacious guest lounge
- Egyptian cotton linen, bathrobes
- Breakfast cooked to order.
- Hospitality tray & mini-fridge.
- Free on-site parking.
