Orangethroat is a heterozygous polled cow with piles of milk. She comes from a great maternal line going back to Kype Ulay, whose descendants include the likes of Dinmore Elle and Lenagh Morpheus. Her calf Summerblossom is by GTMO Balfour a homozygous polled bull. She could be either heter or homosygous polled. Both animals qualify internationally as fullbloods as no upgrading was involved in introducing the polled genetics but rather, they were developed by following very rare polled lines naturally found in the breed. This is a great and rare opportunity for someone interested in polled genetics.

Rousha is from the Countess cow family. She carries some of the most extreme muscled lines going within the Limousin breed and it definitely shows! Her dam Ladyita is the most extreme Millgate Fame daughter we've bred. Despite her great shape Ladyita calves naturally every year and milks well too- a combination of traits hard to pull together. Her sire Huntershall Nutcracker sold in Carlisle for 17,000gns. He too is extreme muscled as well as being packed with style and is proving to be an easy calver. He himself being natural born Rossignol heifer's calf. Rousha is of the first Nutcracker heifers to be sold and for those out there looking for extreme shape, this is a heifer well worth consideration!

THE NATIONAL BEEF ASSOCIATION

Revision December 2014

Annex 1

Guidelines for the Standards of Good Husbandry and Management In respect of bulls purchased at Sales

Taking care to settle a newly purchased bull properly will assist in ensuring that you have many years of good service from him.

Under the National Beef Association's Terms and Conditions of Sale the Purchaser is required to maintain the animal in normal breeding condition, in condition with the rules and practice of Good Animal Husbandry and Management, as referred to in clauses 4.2 and 7.1.4 and 8.3.2.

Following Purchase the National Beef Association would require a Purchaser to adhere to the following points to fulfil the requirement of Good Husbandry and Management:

- 1 The bull should not be used within two weeks of the date of Purchase
- 2 The Purchaser should ensure that the bull is in normal breeding condition before use
- 3 In consultation with the Vendor, the Purchaser should maintain the bull on its current diet and only introduce any new feed gradually
- 4 When the bull is first used, try it with 1 or 2 smaller females first, in a yard on a non-slip surface, so he is introduced to service gradually and safely. Observe him closely to ensure that he is serving the female properly
- 5 Once the Purchaser is satisfied that these females are not returning, then he should put the bull out with more females. 20 to 25 females should be a maximum in the first year.

These are guidelines only. Purchasers should be aware that should they choose not to follow them they might invalidate these Terms. In addition you may refer to the relevant Breed Society's guidelines.
