* Where animals have been genotyped, the breeding values for these traits will be Genomic Breeding Values (GEBVs). Publication of GEBVs is at animal owners' discretion. If an animal has not been genotyped, the breeding value will be a conventional Estimated Breeding Value (EBV). Whether a breeding value is an EBV or a GEBV is noted alongside each value.

Please note that EBVs and GEBVs are interchangeable for the same trait. For example, an animal with a Calving Interval GEBV can be compared to an animal with a Calving Interval EBV. A link to further information on all EBVs and GEBVs is below.

FOR INFORMATION

Breeding Indexes

EBVs can be combined in to selection indexes to meet wider breeding objectives:

Calving Value	An economic indicator of the collective value of Gestation Length and Calving Ease.
Beef Value	An economic indicator of the collective value of Birth Weight, Calving Ease, 400-Day Growth, Muscle Depth and Backfat Depth.
Retail Value	An economic indicator of the collective value of Fillet, Striploin, Rump, Topside, Silverside and Knuckle at 600 days of age and a standard carcase weight of 350kgs.

NB: Using Calving Ease and Maternal Calving Ease

Calving Ease EBV *Predicts how easily a bull's own calves will be born.*

Maternal Calving Ease EBV *Predicts how easily a bull's daughters will calve.*

Foreword

COLUMBJOHN FARM LTD.

Columbjohn, Rewe, Exeter, Devon, EX5 4ER

Kivells are delighted to have received instructions on behalf of Patrick and Sheila Greed to conduct this reduction sale of their “Killerton” herd of Pedigree Limousins which is being removed to Exeter Livestock Centre for convenience of sale on Friday 19th November.

The decision has been made to hold this reduction sale due to landlords ending an FBT and introducing a rewilding project in a large area of Culm River meadows which has resulted in a loss of 180 acres.

The Killerton herd was established in 1995 when the decision was made to move from a commercial suckler herd to a pedigree herd. The herd has run at around 180 cows plus followers with the focus being on producing easy calving animals with high growth rates, plenty of milk and excellent temperaments. Top quality bulls have been purchased and AI has been used selectively. The Killerton herd has seen numerous successes in the showing and also won multiple prizes in the South West Club herd competition, winning best extra large and overall herd for two years running.

Management

The herd is managed commercially with the majority of cows being outwintered on stubble turnips.

Herd Health

The herd has been closed since 2017 and is a member of the CHeCS accredited health scheme, vaccinating for IBR, Lepto & BVD and monitoring Johnes. Calves are all BVD tag tested negative. The herd passed their most recent whole herd TB test on 20th September 2021.

Auctioneers Comment

Having had the pleasure of selling bulls and females from the Killerton Herd for many years, we are delighted to be holding this reduction sale at Exeter Livestock Centre. This is a genuine reduction due to loss of a large acreage and Patrick has selected cattle from his best lines in the herd including some great brood cows with fantastic calves at foot. The served and yearling heifers are looking exceptional with some real show potential amongst them. This will be one of the most exciting sales of pedigree Limousins to take place in the South West for some time and every effort should be made to attend this important sale.

Kivells

**The sale comprises 24 Cows with Calves at Foot, 13 In-Calf & Served Heifers,
16 Maiden Heifers and 4 Bulls.**

This reduction sale will be sold in Guineas (£1.05).

The Beef Values quoted have been taken from the 2021 Limousin Breed Benchmark.

Due to the use of stock bulls, due dates are given as the vet's best estimate and should be treated as a guide only, although all cows & heifers are warranted in-calf unless stated otherwise.
