## Show & Sale Notes

All cattle will be sold under the L.A.A. conditions of sale – a copy is displayed in the Main Office.

There will be no substitute cattle.

Pedigree transfers: Official Pedigree transfers will be affected by the British Limousin Cattle Society as soon as possible after the Sale

**All exhibitors in the show must wear a white coat.**

Entry into the show is open to all halter led pedigree cattle only.

All cattle will be sold in Guinea's (£1.05)

Prize money will be forfeited if the animal is not sold.

All animals must be in the market and booked in by 8.00am with the CCM staff.

It is the sole responsibility of the vendor to ensure the animal being presented is that described in the catalogue.

Market staff will try to make suitable announcements regarding classes, it is the vendors responsibility to ensure animals are in the show ring at the correct time, cattle not forward at the correct time will not be judged.

In any dispute the Auctioneers decision is final.

For any further information please contact Ted Ogden on 07855 958211.

### Facilities

Wash facilities are available on the docks

There are several electric points within the penning area for hair dryers etc.

CCM will provide sawdust for the pens. Only cattle penned overnight on Tuesday may bed with straw. Cattle penned on Wednesday (sale day) may only bed with sawdust.

### 28 DAY NOTIFICATION FOR REGISTRATION RULE

From the launch of the New Taurus platform, animals that are not Birth Notified or Registered within the first 28 days of life, will NOT be eligible for registration within the herdbook.

\*Please Birth Notify any animals approaching 28 days old.

If you wish to register any animal which is over 28 days old (even if it is already birth notified), please ensure it is registered before the launch of New Taurus.\*

Look out for announcements later this Spring regarding the confirmed launch date.

**We kindly draw all customers attention to the notice below**

**CRAVEN CATTLE MARTS LTD (CCM) – TERMS OF TRADING**

All purchases made through CCM are due for payment in full on the day of sale and before any such purchases leave the mart or sale premises.

CCM will accept payment by Cheque (from known customers); Bank Transfer (by prior approval) and Debit card. Payments made via a Business Credit Card that is linked to a Business Bank account will incur a 2% surcharge on all such transactions.

No purchases will be allowed to leave the mart or sale premises until invoices have been issued and relevant licensing arrangements made with the mart office.

New customers or those not having traded with CCM for a period of 2 years or more, together with agents wishing to purchase on behalf of a third party must contact CCM's mart office at least 48 hours prior to sale to complete an Account Registration Form for approval to purchase.

In all circumstances, CCM reserve the right to either contra or retain part or whole of any sale proceeds to offset against an outstanding account with the company.

Sales are conducted according to the Livestock Auctioneers Association Ltd Conditions of Sale as displayed in the mart office and are subject to these Terms of Trading.

*Telephone and commission bids accepted, contact the office on 01756 792375 to arrange*

## **The North East Limousin sale on Wednesday the 13<sup>th</sup> May 2026** **is a CLUB sale**

### **Vendors' Index**

All information presented for the purposes of this sale, including but not limited to pedigree records, DNA data, breeding values and other animal and herd records, is compiled from material supplied by members, owners, and/or third parties. While every effort is made to ensure accuracy, the Society and its officers and employees make no representation or warranty, expressed or implied, as to the accuracy, reliability, completeness, or correctness of the information. Users should not rely solely on this information for making decisions and are advised to obtain independent verification or professional advice where appropriate. The content is provided for general information purposes only and does not constitute veterinary, professional, or legal advice.

The Society, its officers and employees accept no responsibility or liability for any loss, damage, cost, or expense, whether direct, indirect or consequential, arising from the use of, reliance on, or interpretation of the information presented for the purposes of this sale, or from any third-party content or links provided. Nothing in this disclaimer shall exclude or limit liability for death or personal injury caused by negligence, fraud, fraudulent misrepresentation, or any other liability which cannot be excluded or limited by law. This disclaimer and the use of all information presented for the purposes of this sale are governed by the laws of England and Wales, and any disputes arising in connection with them shall be subject to the exclusive jurisdiction of the courts of England and Wales.

\* Where animals have been genotyped, the breeding values for these traits will be Genomic Breeding Values (GEBVs). Publication of GEBVs is at animal owners' discretion. If an animal has not been genotyped, the breeding value will be a conventional Estimated Breeding Value (EBV). Whether a breeding value is an EBV or a GEBV is noted alongside each value.

Please note that EBVs and GEBVs are interchangeable for the same trait. For example, an animal with a Calving Interval GEBV can be directly compared to an animal with a Calving Interval EBV. A link to further information on all EBVs and GEBVs is below.

## FOR INFORMATION

### Breeding Indexes

EBVs can be combined in to selection indexes to meet wider breeding objectives...

<b>Calving Value</b>	An economic indicator of the collective value of Gestation Length and Calving Ease
<b>Beef Value</b>	An economic indicator of the collective value of Birth Weight, Calving Ease, 400-Day Growth, Muscle Depth and Backfat Depth
<b>Retail Value</b>	An economic indicator of the collective value of Fillet, Striploin, Rump, Topside, Silverside and Knuckle at 600 days of age and a standard carcass weight of 350kgs.

### NB: Using Calving Ease and Maternal Calving Ease

**Calving Ease EBV** *Predicts how easy a bull's own calves will be born.*

**Maternal Calving Ease EBV** *Predicts how easily a bull's daughters will calve.*

To search the Limousin database by Breeder, by EBVs/GEBVs and/or by Individual Animal go to [www.taurusdata.co.uk](http://www.taurusdata.co.uk) and click on 'Beef Search'

For more information on EBVs and GEBVs please go to [www.limousin.co.uk](http://www.limousin.co.uk) and click on 'Performance Programmes' or get in touch on the numbers below.

## HOW TO USE GENETIC INFORMATION IN THIS CATALOGUE

Sale catalogues contain specific information relating to the genetics of each animal. This is a short explanatory note to assist when selection decisions are being made.

**Lot 10 Mr A. Breeder**  
**Concorde Magician**  
Born 18/04/2016

UK 123456/654321

Got by AI **1**

Natural Calf

### 1 Birth Type

'Got by AI' indicates whether the calf was a result of an AI service. If blank, the dam was naturally served. 'Natural calf' indicates the calf was born to its biological dam. 'ET calf' indicates the calf was born as a result of embryo transplant.

### 2 Myostatin

"Not tested" indicates that no Myostatin test is currently available for the animal. Full details on the Myostatin variants and their effects on performance can be found on the Limousin Society website [www.limousin.co.uk](http://www.limousin.co.uk), search in 'performance programmes'. In summary:

### The Variants:

**F94L**  
Animals with two copies of this gene (ie F94L/F94L) exhibit an increase in muscling (by up to 19%) with **no** associated increase in calving difficulty, lowered fertility or longevity and by far the majority of animals in the breed carry this gene. Heterozygous animals (those with one copy of the gene) also exhibit these characteristics but not to the same degree.

**NT821**  
Animals with two copies of the gene (ie nt821/nt821) will exhibit characteristics of larger loin depths, reduced fat depths and large, rounded rump and thighs. However, unlike F94L, animals with two copies may also have slightly heavier birth weights bringing with it the potential for more difficult calvings, if animals are 'heterozygous' with F94L (ie F94L/nt821) they will still exhibit quality carcass characteristics but are less likely to be affected by more difficult calvings.

**Q204X**  
Animals with two copies of the gene (ie Q204X/Q204X) will exhibit characteristics of larger loin depth, reduced fat cover and greater meat tenderness. However, they may also have the potential to exhibit larger birth weight and, if females, slightly reduced milking ability. Animals that are 'heterozygous' with F94L (ie F94L/Q204X) will still exhibit quality carcass characteristics but are less likely to be affected by larger birth weights and reduced milking ability.

Two further variants of Myostatin exist in the population but are relatively uncommon in their occurrence. Known as nt419 and E291X, their effects are similar to nt821 and Q204X respectively.

### The recognised benefits of Myostatin are:

- ✓ Increased Meat Yield – by up to 19%.
- ✓ More feed efficient
- ✓ Higher meat quality – increased tenderness, reduced fat content, higher polyunsaturated fats

## Using Myostatin Information

An important factor to remember is that carcass traits (muscling, fat cover etc), calving traits and milk traits in cattle are controlled by **MAFY** genes. Myostatin is only one of them and, as such, it is **not** an absolute predictor of an animal's performance.

A Myostatin genotype is a further bit of information that may help your decision, but it should be used in conjunction with wider information such as Estimated Breeding Values (EBVs), which bring together information of actual performance from the animal itself, its herdmates and its relatives to predict genetic merit, and your own judgment on type and pedigree.

### 3 Genetic Colour

Colour and polled/horned genes typically come in pairs called alleles. One is inherited from the sire and one from the dam. Where an animal's alleles are the same, it is said to be 'homozygous' (Hom.) Where the alleles are different (because there is more than one variant of the gene, the animal is said to be 'heterozygous' (Het.)

"Hom. Red" – animals will be red and will pass on red genes.

"Hom. Black" – animals will be black and will pass on black genes. All calves will be black, since black colour genes are dominant.

"Het. Black" – animals will be black and will pass on either a red or black gene.

"Het. Red" – animals will be red and will pass on a red gene or a colour gene known as the 'wild type' that is non-colour determinate. (The coat colour of calves inheriting the wild type gene will be governed by the gene they inherit from the other parent. It is rare, but it is also possible for an animal to be homozygous for the wild type gene, in which case they will be reddish/brown to brownish/black).

### 4 Genetics for Horned/Polled Status

A bull that is "Hom. Polled" - will be polled himself and all calves will be polled (since he only has polled genes to pass on and they are dominant).

A bull that is "Het. Polled" – will be polled himself and will produce some polled and some horned calves (assuming the cows are all horned).

A bull that is "Hom. Horned" – will be horned himself and will pass only horned genes to his calves.

For more information on both Genetic Colour and Polled/Horned, go to [www.limousin.co.uk](http://www.limousin.co.uk), search in 'performance programmes' or scan the QR code above.

### 5 Estimated Breeding Values and Genomic Estimated Breeding Values (EBVs & GEBVs)

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average.

a) In sale catalogues, **Breed Average for each trait is represented by the vertical line that is central on the bar chart...**

- ✓ Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are.
- ✓ Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are.

b) Accuracy Values (Acc%) are expressed as a % and indicate the quantity and quality of records used to produce each EBV, GEBV or Index. The closer they are to 100%, the more accurate the EBV. Highly accurate values are less likely to change over time.

c) The numeric EBV & GEBV values on the charts can be used to further refine comparison with the breed using the Breed Benchmark which is updated annually.

For more information on EBVs and GEBVs, go to [www.limousin.co.uk](http://www.limousin.co.uk) and search under 'Breed Improvement' in the main menu or scan the QR code opposite.

**EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...**

**Step 1:** Go to [www.taurusaia.co.uk](http://www.taurusaia.co.uk)

**Step 2:** In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

### 6 Adjusted Weights

These are the 'raw' weights recorded for the animal throughout its early growing stages. They are adjusted for age, but are not adjusted for any other factor such as management, nutrition, dam age, differences between farms etc.

For further information or if you have any query, please let us know - telephone 02476 6955200, e-mail [info@limousin.co.uk](mailto:info@limousin.co.uk) or speak to Society staff and Council members attending the sale.

## **Herd Health at British Limousin Cattle Society Sales**

**The North East Club sale at Skipton Auction Mart on the 13<sup>th</sup> May 2026 is a CLUB sale.**

**Premier Collective and Collective Sales and Society Sale of Weaned Calves (Carlisle, December).**

### **Introduction**

Herd health rules were introduced by the BLCS at Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) to standardise herd health declarations and information presented in order to provide both members and customers with clear, accurate herd health information at the point of sale and within the given sale catalogue. As such it is attractive and informative for customers and aims to further raise the level of buyer confidence.

**BLCS Premier Collective Sales** are Stirling February (bulls) & October (bulls); Carlisle February (bulls), May (bulls), October (bulls) & December (Red Ladies sale); Brecon May (bulls) & November (bulls).

**BLCS Collective Sales** are Ballymena February (bulls), May (bulls) & October (bulls); Stirling May (bulls); Carlisle June (bulls).

Part 1. Herds selling at the Premier Collective Sales, Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme and at a minimum they must have had a whole herd test for Johne's Disease with a CHeCS approved Herd Health Scheme and must be a Johne's Risk Level 1\* - 4.

Part 2. All animals male and female, including calves at foot, presented at the Premier Collective and Collective Sales are required to be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. Pregnant animals must have had testing and any vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

For the Society Sale of Weaned Calves (Carlisle, December), calves are not required to be vaccinated for BVD. Calves from non-BVD accredited herds are required to have been BVD tested virus free. Calves from BVD Accredited Herds are not required to have been BVD tested virus free.

### **Herd Health Declaration**

The sale entry form is accompanied by a Herd Health Declaration form asking vendors questions for example: TB status; membership of CHeCS ([www.checs.co.uk](http://www.checs.co.uk)) health schemes (AFBI Cattle Health Scheme, HiHealth Herdcare (Biobest), & Premium Cattle Health Scheme (SRUC) and Johne's, BVD, IBR and Lepto status. Online entries also require the Herd Health Declaration form to be completed.

#### **Is the Herd Health Declaration compulsory?**

The Herd Health Declaration is compulsory at all Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December). For reasons of clarity and to provide purchasers with the most accurate information available, vendors are required to complete this at time of entry.

#### **What other health information may be displayed?**

It should be noted that the Herd Health information provided in the catalogue relates to whole herd status. Information relating to specific animals entered in the sale should be requested from the vendor.

Vendors are encouraged to apply to their respective CHeCS health scheme for individual animal health cards for display on pens. For an individual animal's test results, or vaccination histories, regarding BVD, IBR, Lepto or Johne's, these are permitted above the sale pens only upon presentation of a signed veterinary declaration to verify that the animal concerned has had a clear test. The Society has requested that no declarations on health information be given by the auctioneer during the sale. Again, the sole purpose of this is to avoid confusion and to try and ensure that the information provided is done accurately, fairly and in a standardised format in the catalogue. This point has been agreed with the auctioneers.

## Johne's Risk Levels

It is a condition of BLCS Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) that animals from herds that are Johnes Risk Level 5 are not permitted to be sold.

Should you have any queries regarding the Johne's Risk Level classification, please contact your respective CHeCS health scheme.

### Breeders, Production, Reduction Sales

**BLCS Breeders Sales** are Stirling February (females), May (females) & October (females); Carlisle February (females), May (females) & October (females); Brecon May (females) & November (females); Ballymena February (females), May (females) & October (females); Thainstone Multibreed (bulls and females).

Part 1. Vendors at official Society Breeders, Production and Reduction Sales are required to complete a Herd Health Declaration form at time of entry. A condensed version of the given herd health information will appear in the Vendors' Index in the respective catalogue.

All information provided is supplied by the vendor and it is their responsibility to ensure all the details are correct.

Part 2. All animals presented for sale at official Society Breeders, Production and Reduction Sales are required to be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. Pregnant animals must have had testing and any vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

### BLCS SOCIETY SALE TYPES

The British Limousin Cattle Society holds a variety of sale types throughout each year. Here is a reminder of the entry requirements and what they offer to buyers:

\*individual club sales rules may vary

	Premier	Collective	Breeders	Weaned Calves	Club
Herd Health Dec required	✓	✓	✓	✓	✓
Must be in a health scheme	✓	✓	✓	✓	✓
Must be Johnes Risk Level 1*, 1 – 4	✓	✓	✓ From 01/01/27	P	✓ From 01/01/27
Must be BVD Accredited or Virus Free	✓	✓	✓	✓	✓
Must have DNA Parentage Verification & Myostatin	✓	✓		✓	
Must be Registered or Birth Notified within 28 Days if born after 01/01/2020	✓				
Subject to Upset Price	✓	✓			
Subject to Inspection	✓	✓			

**What if a vendor is selling an animal/s that is not home bred or born on another holding?**

Vendors are still requested to fill in the Herd Health Sale Declaration accordingly. Prospective customers are still advised to speak to vendors directly regarding additional health information available.

The herd an animal is sold from must have had a whole herd test, for Johne's disease through a CHeCS licenced scheme and in adherence with that scheme's terms.

Animals may not be sold at Society Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) sale, if the herd of origin (i.e. the holding where the calf was born) has no Johne's status or a status of Risk Level 5.

Any animal bred by a person other than the vendor or born on a holding separate to the vendor's main herd will have the Johne's status of the herd/holding of origin at the time of sale stated in the sale catalogue, along with the Johne's status of the vendor's herd.

The catalogue will indicate who bred the animal if it has not been bred by the vendor. These measures comply with the requirements of CHeCS and the information must be provided by the vendor upon entry of an animal to a sale.

**What if a vendor is selling an animal/s managed on a holding other than the vendors?**

Any animal that has been managed on a holding other than the vendor's immediately prior to sale will have the Johne's status of that holding stated in the sale catalogue along with the Johne's status of the vendor's herd. These measures comply with the requirements of CHeCS and the information must be provided by the vendor upon entry of an animal to a sale.

**Feedback & more information**

If you have any questions, please speak to Society representatives, Council representatives or the Auctioneers.
